Ou Va L'education:

Pratiquer l'éducation thérapeutique Xavier De La Tribonnière, 2023-10-17 L'education thérapeutique est en plein essor et désormais fortement recommandée par toutes les sociétés savantes pour la prise en charge de chaque maladie chronique. Pour être autonome, le patient a besoin d'être soutenu et accompagné dans l'apprentissage de sa pathologie, de ses traitements, de ses comportements de santé et de pouvoir exprimer son vécu de la maladie. Dans ce livre, des réponses pratiques sont apportées aux acteurs de soin pour la mise en place de programme d'éducation thérapeutique et d'activité éducative. Les fondements pédagogique, psychologique et thérapeutique sont également présentés comme la recherche. Cette 2e édition augmente et permet d'aborder des thémes nouveaux : utilisation du numérique, place des patients, partenaires, impact de la pandémie Covid-19, spécificités par pathologie ou public, interventions non médicamenteuses, unités de ressources, communication, etc. Des fiches pratiques aident la concrétisation. À la fois guide pratique et document ressource, cet ouvrage est rédigé par plus de 30 experts du domaine, tous parfaitement pédagogues.

Schneuwly, 2006 This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable couple intrinsically linked and surprisingly fruitful. Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a laboratory for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses et passionnelles entre l'Education nouvelle et des Sciences de l'éducation, un couple indissociable, intrinsiquement lié et d'une tonnante force, condit autant qu'inconciliable. Nombre de leurs propos et caractéristiques se contredisent mutuellement. Les Sciences de l'éducation offrent elles la base scientifique ou l'appui idéologique de l'Education nouvelle. Les nombreuses expériences et formes éducatives constituent elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques. Au risque de leur fusion, au prix de quelques tensions, Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle, d'horizons géographiques, culturels et disciplinaires divers, explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.
