## **Our Changing Cities:**

Our Changing Cities John Fraser Hart, 1991-08 In Our Changing Cities some of the nation's most eminent urban geographers bring their special expertise to bear on the American urban scene. They describe how our cities have evolved, assess their current character and look ahead to the momentous changes yet to come. The Changing Face of World Cities Maurice Crul, John Mollenkopf, 2012-08-01 A seismic population shift is taking place as many formerly racially homogeneous cities in the West attract a diverse influx of newcomers seeking economic and social advancement. In The Changing Face of World Cities a distinguished group of immigration experts presents the first systematic data based comparison of the lives of young adult children of immigrants growing up in seventeen big cities of Western Europe and the United States. Drawing on a comprehensive set of surveys this important book brings together new evidence about the international immigrant experience and provides far reaching lessons for devising more effective public policies. The Changing Face of World Cities pairs European and American researchers to explore how youths of immigrant origin negotiate educational systems, labor markets, gender, neighborhoods, citizenship and identity on both sides of the Atlantic. Maurice Crul and his co-authors compare the educational trajectories of second generation Mexicans in Los Angeles with second generation Turks in Western European cities. In the United States uneven school quality in disadvantaged immigrant neighborhoods and the high cost of college are the main barriers to educational advancement while in some European countries rigid early selection sorts many students off the college track and into dead end jobs. Liza Reisel Laurence Lessard Phillips and Phil Kasinitz find that while more young members of the second generation are employed in the United States than in Europe they are also likely to hold low paying jobs that barely lift them out of poverty. In Europe where immigrant youth suffer from higher unemployment the embattled European welfare system still yields them a higher standard of living than many of their American counterparts. Turning to issues of identity and belonging Jens Schneider, Leo Chávez, Louis DeSipio and Mary Waters find that it is far easier for the children of Dominican or Mexican immigrants to identify as American in part because the United States takes hyphenated identities for granted. In Europe religious bias against Islam makes it hard for young people of Turkish origin to identify strongly as German, French or Swedish. Editors Maurice Crul and John Mollenkopf conclude that despite the barriers these youngsters encounter on both continents they are making real progress relative to their parents and are beginning to close the gap with the native born. The Changing Face of World Cities goes well beyond existing immigration literature focused on the United States experience to show that national policies on each side of the Atlantic can be enriched by lessons from the other. The Changing Face of World Cities will be vital reading for anyone interested in the young people who will shape the future of our increasingly interconnected global economy. Two Degrees: The Built Environment and Our Changing Climate Alasdair McGregor, Cole Roberts, Fiona Cousins, 2013-05-02 The Earth's temperature has been rising. To limit catastrophic outcomes the international scientific community has set a challenging goal of no more than two degrees.

Celsius 3.6 degrees Fahrenheit average temperature rise. Economists agree we will save trillions of dollars by acting early. But how do we act successfully? And what's the backup plan if we fall short? *Setting politics aside* Two Degrees reviews the current science and explains how we can set practical steps to reduce the extent of warming and to adapt to the inevitable changes all while improving the bottom line, beautifying our communities and increasing human health. The book is a practical guide intended for a broad audience of those who occupy and shape our built environment. The authors provide a clear framework for communities, policy makers, planners, designers, developers, builders and operators to help manage the impacts and capture the opportunities of our changing climate. Two Degrees is divided into three sections: Fundamentals, Mitigation and Adaptation, covering a diverse array of topics ranging from climate positive communities and low carbon buildings to the psychology of choice and the cost of a low carbon economy. After a foreword by Amory Lovins, more than 10 contributing authors share knowledge based on direct experience in all aspects of built environment practice. This book clarifies the misconceptions, provides new and unique insights and shows how a better approach to the built environment can increase resilience and positively shape our future.

### **Immigration and the Changing Social Fabric of American Cities**

John MacDonald, Robert J. Sampson, 2012-05. This volume of *The ANNALS* brings together a leading set of scholars to present new research on trends in the spatial forms of immigration that are transforming the American landscape: the effects of the world in a city. With a distinct analytic focus, the volume takes a comparative approach, examining recent immigration trends, disaggregating by ethnicity or immigrant type wherever possible, focusing on core features of the nation's social fabric (e.g., violence, legitimacy of social institutions, governance, economic well-being) and empirically going beyond the big cities of traditional concern to a host of smaller cities and towns, reaching into far-flung pockets of the country. The lineup includes papers on both familiar cities such as New York, Los Angeles, Chicago, and Miami, as well as places as different as San Antonio, Nashville, Boston, Dublin, Hazleton, Pennsylvania, and St. James, Minnesota. While the places studied and features of their social fabric may differ, the social processes underlying the spatial forms of immigration are shown to be largely the same. This volume will be of interest to social scientists from a broad range of disciplines who engage in research and teaching on issues related to immigration policy makers and individuals working on immigration policy research.

### **Changing Cities**

Nick Buck, Ian Richard Gordon, Alan Harding, 2017-03-16. A new conventional wisdom spanning academic and policy communities sees a combination of economic competitiveness, social cohesion and responsive governance as essential for survival in the post-1980s world and cities as crucial to achieving these goals. This interdisciplinary text provides the first critical examination of these ideas, drawing on the UK Cities research programme and other recent research. It combines analysis of the competitiveness-cohesion-governance problematic with examination of the major processes underlying key sectors of the urban economy: physical development, social relations, neighbourhoods and urban policy.

In this text Ford offers an account of the relationship between urban architecture especially vernacular architecture and the spatial arrangement and development of cities in North America From office towers in the central business district to commercial strips in the edge city Ford shows how changes in the built environment parallel changes in urban economies and human culture Focusing on ordinary structures rather than famous landmarks the book aims to provide a guide to understanding the changing character of any urban landscape

**Changing American Countryside** Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse

issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life    Annual Report
