**Trauma Therapy** Robert Durante, 2020-12-10

**Book Description** Do you want to change your life? Do you want to overcome past traumas? In general trauma is considered a physical and psychiatric condition. The profession of modern medicine and psychology deeply underestimates their deep interaction with pain treatment thus offering lip service to a connection between mind and body. The welded unity of body and mind which has formed the philosophical and practical foundations of most of the traditional healing systems in the world unfortunately does not provide our modern understanding and treatment. Oriental and shamanic healers have for thousands of years understood not only that the mind affects the body like in psychosomatic medicine but also that every organ system of the body has a psychic appearance in the body. Many stress treatments discuss the psyche through interaction and the chemicals of the mind with medicine. Both methods can be useful. However trauma is not healed and will never be treated in full unless we think of the essential role of the body. We must consider the impact of trauma and its key role in the repair of its effects on the body. Our attempts to heal injuries without this basis are insufficient and arbitrary. This book however encompasses all the aspects of developmental trauma healing. The areas covered are as under: Trauma an introduction, Healing Developmental Trauma, Road to recovery, Self awareness, Building support system and growth of mind and body. In order to explore further a thorough read of this book is a must. So do not wait and get your copy now!
