**The Moral Ecology of Markets** Daniel Finn, 2006-01-16 Disagreements about the morality of markets and about self interested behavior within markets run deep They arise from perspectives within economics and political philosophy that appear to have nothing in common In this book Daniel Finn provides a framework for understanding these conflicting points of view Recounting the arguments for and against markets and self interest he argues that every economy must address four fundamental problems allocation distribution scale and the quality of relations In addition every perspective on the morality of markets addresses explicitly or implicitly the economic political and cultural contexts of markets or what Finn terms the moral ecology of markets His book enables a dialogue among the various participants in the debate over justice in markets In this process Finn engages with major figures in political philosophy including John Rawls Robert Nozick and Michael Walzer as well as in economics notably Milton Friedman Friedrich Hayek and James Buchanan

*Market Justice* Brent Z. Kaup, 2012-12-24 Market Justice explores the challenges for the new global left as it seeks to construct alternative means of societal organization Focusing on Bolivia Brent Z Kaup examines a testing ground of neoliberal and counter neoliberal policies and an exemplar of bottom up globalization Kaup argues that radical shifts towards and away from free market economic trajectories are not merely shaped by battles between transnational actors and local populations but also by conflicts between competing domestic elites and the ability of the oppressed to overcome traditional class divides Further the author asserts that struggles against free markets are not evidence of opposition to globalization or transnational corporations They should instead be understood as struggles over the forms of global integration and who benefits from them
