Mars And The Inner Planets:

The Inner Planets Britannica Educational Publishing, 2011-05-01 Despite their proximity to Earth much remains to be learned about the origins and conditions of Mercury Venus and Mars The three smallest planets in our solar system and the three closest to the Sun Mercury Venus and Mars differ greatly from each other and from the place we call home This far reaching volume travels to each of the inner planets in turn and details the physical characteristics as well as the exploration efforts made in order to learn more about our closest planetary neighbors

Mars and the Inner Planets Gregory Vogt, 1982-01-01 Provides a brief history of planetary studies and exploration focusing on Mars and the inner planets Mercury and Venus

The Inner Planets Clark R. Chapman, 1977 America keeps a fine house Anatol Lieven writes but in its cellar there lives a demon whose name is nationalism In this controversial critique of America's role in the world Lieven contends that U S foreign policy since 9 11 has been shaped by the special character of our national identity which embraces two contradictory features One The American Creed is a civic nationalism which espouses liberty democracy and the rule of law It is our greatest legacy to the world But our almost religious belief in the Creed creates a tendency toward a dangerously messianic element in American nationalism the desire to extend American values and American democracy to the whole world irrespective of the needs and desires of others The other feature populist or what is sometimes called Jacksonian nationalism has its roots in an aggrieved embittered and defensive White America centered largely in the American South Where the Creed is optimistic and triumphalist Jacksonian nationalism is fed by a profound pessimism and a sense of personal social religious and sectional defeat Lieven examines how these two antithetical impulses have played out in recent US policy especially in the Middle East and in the nature of U S support for Israel He suggests that in this region the uneasy combination of policies based on two contradictory traditions have gravely undermined U S credibility and complicated the war against terrorism It has never been more vital that Americans understand our national character This hard hitting critique directs a spotlight on the American political soul and on the curious mixture of chauvinism and idealism that has driven the Bush administration

The New Cosmos Albrecht Unsöld, Bodo Baschek, 2013-06-29 Astronomy astrophysics and space research have witnessed an explosive development over the last few decades The new observational potential offered by space stations and the availability of

powerful and highly specialized computers have revealed novel aspects of the fascinating realm of galaxies quasars stars and planets The present completely revised 5th edition of The New Cosmos provides ample evidence of these dramatic developments In a concise presentation which assumes only a modest prior knowledge of mathematics and physics the book gives a coherent introduction to the entire field of astronomy and astrophysics At the same time it takes into account the art of observation and the fundamental ideas behind their interpretation Like its predecessors this edition of The New Cosmos will provide new insight and enjoyment not only to students and researchers in the fields of astronomy physics and earth sciences but also to a wide range of interested amateurs
