Modeling Marvels Errol G. Lewars,2008-12-05 The aim of this book is to survey a number of chemical compounds that some chemists theoretical and experimental find fascinating Some of these compounds like planar carbon species or oxirene offer no obvious practical applications nitrogen oligomers and polymers in contrast have been touted as possible high energy density materials What unites this otherwise eclectic collection is that these substances are unknown and offer a challenge to theory and to synthesis That such a challenge exists is in some cases almost obvious to most chemists The instability of nitrogen polymers for example might be taken nearly as an axiom to be quantified but not refuted by computations and to be subjected to an almost superfluous but rather challenging validation by synthesis On the other hand oxirene the unsaturated relative of the prosaic oxirane presents no immediately obvious oddity yet this molecule has defied all attempts at synthesis and remains a theoretical conundrum in that it is not certain if it can even exist It is hoped that this collection of idiosyncratic molecules will appeal to chemists who find the study of chemical oddities interesting and on occasion even rewarding A great romp through imagined molecules a challenge to the talents of synthetic chemists Errol Lewars leads us expertly through a wonderland of the chemical imagination fascinating molecular structures that do not yet exist Prof Roald Hoffmann Nobel Laureate Chem 1981 Cornell University New York USA This book is an educational and enjoyable read devoted to species on the fringes of chemical calculation and conceptual plausibility Prof Joel Liebman University of Maryland Baltimore County USA

Persaud,2013-05-21 Doubt and disbelief in God s existence and his plan of redemption for lost humankind is becoming increasingly evident in today s hedonistic self directed world Many Christian believers even choose to listen to and to acknowledge a feel good now Gospel notwithstanding its deviation from Biblical truth and its possible damning implications Conversely many people are wont to deny the existence of a devil and the reality of a place of unceasing torment and or destruction called hell A good God cannot be so cruel they opine Jesus commissioned his followers to take his Gospel to the far reaches of the Earth and the Holy Scriptures encourage Christians in Jude 1 3 to earnestly contend for the faith More than at any other time in history believers must defend the Christian Gospel and advocate its timeless truths everywhere so that all of humankind may hear about Christ s offer of eternal life in a place named Paradise The miscellany of contemplative inquiries and arguments presented in **CONTENDING FOR THE FAITH** purposes to do just that endorse and advance the Gospel of Christ and help establish Biblical truth Much too much is at stake for not spreading or not listening to Christ s entreaty     Origins of the Universe, Life and Species Plammoottil Cherian,2018-03-22 The relationship between science and theology has been a crisis for humanity since Darwin s publication of Origin of Species that affects the very core of scientific and Biblical truths with serious consequences In this detailed and absorbing book Dr Cherian provides astounding facts of science that were deciphered in the last 500 years each of which is recorded in the Biblical Scriptures Heeding back to the Biblical account of creation Dr Cherian takes the readers from the erroneous notion of the origin of the universe without a cause and abiogenesis as the source of life to the latest scientific discoveries that corroborate the Biblical evidence for divine creation of the universe life and species that dispel Darwinian evolution The *Origins of the Universe Life and Species* sheds much light for a better understanding of the Scriptures that were hidden to many scientists researchers and students to relate the scientific discoveries that reveal the Biblical truths for a better appreciation of the unknown God who reveals himself through the many scientists and their discoveries Dr Cherian uses all branches of science from astronomy to zoology connecting the dots between science and theology that stretches from the highest of heavens outer space to the deepest of ocean floor revealing the unknown God to be the KNOWN GOD     **Science Activities** ,1969

The Bible the Kaballah the Vedas and ancient cuneiform tablets torn from their hiding places in the heart of Mother Nature all hold the key to the wisdom of the ages and some there are who have turned the key and the door to understanding has opened The author of this work has found the key and he has turned it Erect and unafraid for he has nothing to lose or gain he reverently offers you that which you are seeking He does not claim to be the only one who has discovered the key but working along the lines hinted at by some modern and many ancient seekers he hereby presents the results of his many years of scientific research He shows that the correct translations of the Greek and Hebrew scriptures plainly state that all the allegories and fables of these works refer to actual physiological facts and the statements Seek ye first the Kingdom of Heaven and all things shall be added unto you The Kingdom of Heaven is within you and Be ye therefore perfect as your Father in Heaven is perfect can be physiologically and chemically explained
