Marx And The New Individual:

Marx and the New Individual (RLE Marxism) Ian Forbes, 2015-04-17 In what is the first sustained analysis of Marx's attitude to the puzzle of the individual in history and society this book first published in 1990 challenges received views on the importance of class analysis and the place of a theory of human nature in Marx's thought The radical possibilities of individual agency in society are explored within a Marxian framework and without recourse to the current fashions of methodological individualism or rational choice theory In the context of the apparent antagonism between collectivist and individualist approaches to political explanation and social change the author establishes that a New Individual of singular importance for the understanding of contemporary society can be identified For the first time the Grundrisse provides the basis of a major analysis of Marx's thoughts on the individual By illustrating the nature of the connections between collective existence and individual experience Ian Forbes makes an important contribution towards the revitalization of socialist thought He also develops a valuable counterpoint to rational actor models of politics and liberal theories of justice alike by establishing the importance of a political theory that values human agency as much as it understands social and historical processes

Marx and the New Individual Ian Forbes, 2015 In what is the first sustained analysis of Marx's attitude to the puzzle of the individual in history and society this book first published in 1990 challenges received views on the importance of class analysis and the place of a theory of human nature in Marx's thought The radical possibilities of individual agency in society are explored within a Marxian framework and without recourse to the current fashions of methodological individualism or rational choice theory In the context of the apparent antagonism between collectivist and individualist approaches to political explanation and so

Marxism and the Individual Cem Eroğul, 2021-09-29 This book attempts to develop a Marxist theory of the human individual It contends that the standard description of the human as a bio psycho social being is fundamentally deficient as it doesn't specify which of these attributes is the determining one As long as this is not done the real nature of humanity cannot be uncovered

The Individual in International Law Anne Peters, Tom Sparks, 2024 The Individual in International Law collects the work of esteemed scholars to examine the effects of humanisation on international law and how individual status rights and obligations have changed the international legal system throughout history and into the present day

Marx's Temporalities Massimiliano Tomba, 2012-11-09 The book rethinks key categories of Marx's work beyond any philosophy of history showing how the plurality of temporal layers that are combined and come into conflict in the violently unifying historical dimension of modernity are central to Marx's thought

Marx and We Sun Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor

can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical foundations

Marx's Ethical Vision Vanessa Christina Wills,2024 A central debate among scholars of Marx concerns whether Marxism has a moral content or is totally amoral perhaps either because it embraces a strict economic determinism or because it nihilistically sides with the proletariat without offering any objective justification for that stance

Philosopher Vanessa Christina Wills argues that Marx does articulate an ethical perspective that is present throughout his writings both the more obviously humanistic and philosophical early writings and his later economic and more empirically grounded studies such as *Capital* The purposiveness of labor gives rise to a normativity already inherent in the present state of things one that can guide us in knowing what sort of world we should build and that further prepares us to build it

Karl Marx's Social and Political Thought Bob Jessop,Russell Wheatley,1999

Twentieth-Century Marxism Daryl Glaser,David M. Walker,2007-09-12 Divided into three parts examining Marxism historically geographically and thematically this book outlines and assesses the Marxist tradition as it developed in the twentieth century and considers its place and standing as we move into the twenty first century

A Study of Marx's View of History Xianda Chen,2025-09-30 This book summarizes the process of Marx s foundation of the view of history into two turning points namely from alienation to alienated labor and then from alienated labor to the materialistic view of history Meanwhile this book makes an in depth analysis of the ideas about the materialistic view of history in recent years which is conducive to further clarifying the ideas of Marxist learners and researchers Besides this book on the basis of the human exploration of historical laws analyzes how Marx broke through the limitations of previous historical views and went deep into history that is the process of discovering the laws of history itself thus profoundly revealing the important reference value of Marx s view of history in the transformation of human historical views It is also conducive to building a bridge of communication between Chinese and Western philosophy promoting international exchanges and cooperation and enriching the ideological connotation of contemporary Marxism
