The Marxian Revolutionary Idea Robert C. Tucker, Woodrow Wilson School of Public and International Affairs. Center of International Studies, 1969 In his parting word about Marx at Highgate Cemetery Engels characterized his friend as before all else a revolutionist This was a true summation of Marx both as a man of action and as a thinker For as a theorist Marx was before all else a theorist of revolution The revolutionary idea was the keystone of his theoretical structure Marxism as he fashioned it with the assistance of Engels was in its essence a theory and program of revolution **The Marxian Revolutionary Idea** Robert Charles Tucker, 1970 *The Revolutionary Ideas of Karl Marx* Alex Callinicos, 2012-01-31 An accessible introduction to the author of Capital and coauthor of The Communist Manifesto with a focus on his relevance in today's world Few thinkers have been declared irrelevant and out of date with such frequency as Karl Marx Hardly a decade has gone by since his death in which establishment critics have not announced the death of his theory And yet despite their best efforts to bury him Marx's specter continues to haunt his detractors more than a century after his passing As the boom and bust cycle of global capitalism continues to widen inequality around the world a new generation is discovering that the problems Marx addressed in his time are remarkably similar to those of our own In this engaging and accessible introduction Alex Callinicos demonstrates that Marx's ideas hold an enduring relevance for today's activists fighting against poverty oppression environmental destruction and the numerous other injustices of the capitalist system **The Formation of the Marxian Revolutionary Idea** Eric Voegelin, 1950 **The Marxian revolutionary idea**, 1969 **The Revolution** Carl Joachim Friedrich, Professor C E Black of Princeton University called this a valuable contribution to our understanding of the revolutionary movements that are now a worldwide phenomenon It includes thoughtful essays on many varieties of revolution considered in the light both of past developments and future prospects The twentieth century was an age of revolution Over many areas of the world the two great ideologies of nationalism and communism spawned violent upheavals often differing in form but aiming at the transformation of the existing order by means of coups d'etat revolutions and wars of national liberation Eleven distinguished political scientists and policy theorists offer a penetrating analysis of the theoretical and substantive aspects of revolution Their scholarly lucid and well balanced essays explore the revolutionary theories and experience of several centuries and apply them to the most crucial problem of this century Carl J Friedrich argues that it is the failure of government which is at the core of the political revolution and shows that constitutional regimes that have allowed little revolutions promoting gradual political and social change have been singularly free of revolutionary upheaval Presenting the thinking of some of the best minds of the 20th century this volume offers important guideposts for the future study of the etiology of revolutions Here are not mere speculative and historical distillations but new insights and conclusions regarding the origin purpose and impact of revolution on the world of today and tomorrow An indispensable work for every student and scholar of comparative politics international relations and the history and theory of Communism it will also be
