Marxism And Philosophy:

Marxism and Philosophy Alex Callinicos,1983 In this book Callinicos explores the ambivalent relationship between Marxism and Philosophy surveying the schools of Marxist philosophy from Engels and the Second International through the revolutionary Hegelianism of the 1920s the Frankfurt School and the anti Hegelian Marxism of Adorno and Althusser

Marxism and the Status of Philosophy Georges Labica,1980 Marxism and the Philosophy of Language V. N. Voloshinov,1973 *Marxism and Philosophy* Karl Korsch,2014-09-24 In Marxism and Philosophy Korsch argues for a reexamination of the relationship between Marxist theory and bourgeois philosophy and insists on the centrality of the Hegelian dialectic and a commitment to revolutionary praxis Although widely attacked in its time Marxism and Philosophy has attained a place among the most important works of twentieth century Marxist theory and continues to merit critical reappraisal from scholars and activists today *Marxism and Philosophy in the Twentieth Century* Richard Hudelson,1990-09-25 Useful to both students and scholars of the social sciences and humanities this book provides a guide to fundamental issues in twentieth century Marxist thought Outlining the two distinct and incompatible critiques of vulgar Marxism Marxist Leninism and humanistic Marxism that gained prominence in the aftermath of World War I this book presents both an historical overview of these two dominant traditions and a critical analysis of their philosophical roots Challenging the viewpoints of Marxist thought which have prevailed in this century Richard Hudelson argues that the supposed philosophical breakthroughs claimed by both Marxist Leninism and humanistic Marxism rest upon flawed reasoning With a careful critique of these prevailing views he presents his own view which while receptive to the social scientific work of current analytical Marxism de emphasizes the importance of philosophy in the study of Marxism Hudelson contends that developments in contemporary philosophy of science will allow for an appreciation of the scientific Marxism of the Second International without recourse to the philosophical theories of humanistic Marxism and Marxist Leninism Also using some of the more recent developments in the philosophy of science this book makes possible a fruitful exchange between analytical Marxism and Marxist Leninism Divided into three parts the book first presents a historical introduction which identifies positions and arguments of historical significance This is followed by an analytical look at various arguments to determine where the strongest position lies Finally the author offers some concluding remarks on the significance of his analysis for current directions within Marxist philosophy The Philosophy of Marx (RLE Marxism) William Leon McBride,2015-04-24 This book first published in 1977 presents for the first time a serious and systematic assessment of Marx primarily as a philosopher It considers all major aspects of Marx's theory its methodology its ontological dimensions its approaches to the descriptions of history and of societies and their economic structures its alleged predictions and its vision of the future as well as some of its intellectual antecedents and twentieth century heirs The presentation of Marx's ideas attempts to be at once faithful to them as distinguished from their reinterpretations by later Marxists and yet novel in form

and language From this unique standpoint the book aims to bring the student of philosophy and of political ideas to a closer understanding of the intellectual foundations of Marx s Capital and his writings in collaboration with Engels **Marxism (Routledge Revivals)** Thomas Sowell,2011-07-26 First published in 1985 Thomas Sowell s book is a crisp lucid and commonsensical introduction to Marx s own writings and to Marxist theory It combines readability with intellectual rigour and distils more than a quarter of a century of Thomas Sowell s research and thought on the philosophical and economic doctrines of Karl Marx Its central theme is that Marxian philosophy must be understood before Marxian economics can be defined The book discusses Marx s ideas including his philosophy of history concept of capitalist exploitation morality and business cycle theory The author s treatment is balanced though often critical and displays a mastery of Marx s own writings which are liberally extracted throughout the text Communism and Philosophy Maurice Campbell Cornforth,1980 **Karl Marx and Contemporary Philosophy** A. Marxist-Leninist Philosophy Institut filosofii (Akademii a nauk SSSR), 1974 *Issues in Marxist Philosophy: Epistemology, science, ideology* John Mepham, David-Hillel Ruben, 1979 This volume emphasise the radical difference between Marx's epistemology and other theories of knowledge **Soviet Marxism and Analytical Philosophies of History** Eero Loone, 1992 No Marketing Blurb Philosophy and Myth in Karl Marx, 2001-01-01 In Karl Marx's early writing first made available many years after his death his economic interpretation of history and his concept of communism were set in a comprehensive philosophical framework Marx's main preoccupation at this time was with man estranged from himself in an alienated world a subjective almost religious theme Taking full account of these earlier writings Robert Tucker critiques and reinterprets Marx's thought He shows how its origins can be located in earlier German philosophers in particular Kant Hegel and Feuerbach Reconstructing the genesis of Marxism in its founder's own mind he clarifies Marx's mystifying contention that Marxism represented Hegelianism turned on its head He then presents a new interpretation based on close textual analysis of the relation between Marx's early philosophical system and the subsequent materialist conception of history as expounded in the later and best known writings of Marx and Engels Against this background Tucker presents *Das Kapital* as a work belonging to the post Hegelian mythical development of German philosophy Considering in turn the genesis of Marxism and the underlying continuity of his thought from the early writings to *Das Kapital* Tucker shows the theme of alienation is central throughout In the years since the book was first written comments and criticism have encouraged Tucker to change his position somewhat This is explained in a new introduction that goes beyond the interpretative enterprise of the rest of the book to assess Marx in relation to contemporary concerns first it presents a critique of Marx's treatment of alienation and then it comments on the moot problem of the continuing relevance of his social and economic thought On the latter point his views have matured and altered during the intervening years and he now finds the economic and social aspects of Marx's thought considerably more relevant than he did before *Marxism and philosophy* Karl Korsch, 1970 *Marxism and Philosophy* is Karl Korsch's masterwork In it he argues for a reexamination of the relationship between Marxist theory and bourgeois philosophy and insists on the centrality of the Hegelian dialectic and a commitment to revolutionary praxis Although widely attacked in its time *Marxism and Philosophy* has attained a place among the most important works of twentieth century Marxist theory and continues to merit critical reappraisal from scholars and activists today *Marxist Writings on History & Philosophy* George Novack, 2002 *The Poverty of Philosophy* Karl Marx, 2008-01-01 Written in the winter of 1846/7 as a response to Proudhon's *Système des Contradictions Économique ou Philosophie de la Misère* this is essential background for appreciating Marx's later work including *Capital* and his *Communist Manifesto* Here Marx begins to explore such concepts as constituted or synthetic value the division of labor and machinery competition and monopoly strikes and the combination of workmen and free trade all of which would later come to play important roles in his social and political philosophy Anyone wishing to understand Marx's approach to capitalism as an

oppressor of the proletariat and as a movement destined to collapse must consider this required reading Prussian philosopher KARL MARX 1818 1883 was a social scientist historian and political revolutionary He is indisputably the most influential socialist thinker to emerge in the 19th century Although scholars largely ignored him in his own lifetime his social economic and political ideas gained rapid acceptance in the socialist movement after his death
