The Agrarian Question in Marx and His Successors (Vol. 2) Utsa Patnaik, 2011 Between 1905 and 1949 the economic and political map of the world was altered decisively The basis was created for the first experiments for establishing an

egalitarian social order Prolonged and intense debates on the nature of agrarian relations and on the role of the peasantry in relation to the working class took place in the course of these revolutionary movements These debates were actuated by the need to theorise the specific class configuration and the class alliances appropriate for achieving the aim not only of overthrowing the old semi feudal order but of establishing the conditions for transition to a more egalitarian and just society These debates remain of immense interest because they were not abstract or scholastic but addressed the very concrete and immediate questions of the class nature of the state and the question of who were the friends and who the enemies of the revolutionary movement This question in turn was linked closely to the analysis of the trend of development of capitalist relations and assessment regarding the nature of the principal contradiction at a given point of time This volume brings together selections from the writings of V I Lenin Rosa Luxemburg and Mao Zedong The editor's Introduction is a masterly exposition of the main themes of these debates and their connection with our times **Marxism and the Agrarian**

Question Athar Hussain, Keith Tribe, 1981 **The Agrarian Question in Socialist Transitions** Ashwani Saith, 2013-10-28 First published in 1986 This collection of eight essays begins with a piece that constructs a preliminary argument concerning the position of the peasantry in the twin transitions the first to industrialisation and the second towards socialism In the poor developing country launching upon both simultaneously the agrarian question bifurcates into two dichotomous sets of issues

Marx and the agrarian question, 1972 *The Elgar Companion to Marxist Economics* Ben Fine, Alfredo Saad-Filho, Marco Boffo, 2012-01-01 This Companion takes stock of the trajectory achievements shortcomings and prospects of Marxist political economy It reflects the contributors shared commitment to bringing the methods theories and concepts of Marx himself to bear across a wide range of topics and perspectives and it provides a testimony to the continuing purpose and vitality of Marxist political economy As a whole this volume analyzes Marxist political economy in three areas the critique of mainstream economics in all of its versions the critical presence of Marxist political economy within and its influence upon each of the social science disciplines and cutting across these the analysis of specific topics that straddle disciplinary boundaries Some of the contributions offer an exposition of basic concepts accessible to the general reader laying out Marx's own contribution its significance and subsequent positions and debates with and within Marxist political economy The authors offer assessments of historical developments to and within capitalism and of its current character and prospects Other chapters adopt a mirror image approach of pinpointing the conditions of contemporary capitalism as a way of interrogating the continuing salience of Marxist analysis This volume will inform and inspire a new generation of students and scholars to become familiar with Marxist political economy from an enlightened and unprejudiced position and to use their knowledge as both a resource and gateway to future study **Collected Works of V.
