## Merchants And Capitalists:

**Peasants, Landlords and Merchant Capitalists** Peter Kriedte,1983      *Tradefull Merchants* John

McVeagh,2025-11-21 Tradefull Merchants 1981 surveys the range of English literature from the sixteenth to the twentieth centuries and explores the successive new lights in which the commercial character has been depicted in poetry drama and fiction and thus in society at large As capitalism began to develop into the dominant organisation of social life during and after the sixteenth century in England literature reflected and commented on the profound change in society s attitudes to trade and trading men Through this survey of literature s attitudes to capitalism the author highlights the close relationship between imaginative writing and the material and social life of the country      *Creating A World Economy* Alan K.

Smith,2019-04-02 This is an exploration in world history that examines complex and intriguing questions concerning the origins of the first truly global economy centered in Europe which served in turn as a solid basis for the later emergence of the modern world system Professor Smith first examines the remarkable progress achieved by many cultures around the world achievements that for some time far exceeded anything then found in Europe The study then probes beyond traditionalism as a sufficient explanation of the inability of these societies to maintain the economic momentum that had begun so auspiciously and carefully examines the experience of European societies by way of comparison finding that remarkably similar processes tended to unfold at first regions of Europe that made the earliest gains in material progress were like other parts of the world unable to sustain these advances Still in some parts of Europe particularly the Netherlands and England a new alignment of social forces was yielding the social system that would eventually evolve into capitalism This breakthrough allowed for continued dynamic material progress particularly for the English Able to establish an unprecedented commercial dominance in vast reaches of the world the British found themselves at the hub of a new world economy much more complex than any earlier intercultural commercial system The book delineates the systemic roles assumed by the various regions of the world and by European merchant capital and explains the tensions within this system that ensured its continued dynamism and eventual transformation into the current world economic system *Creating a World Economy* combines an epic sweep with a mastery of historical detail and is sure to stimulate discussion among sociologists and historians interested in questions of a global nature      *The Merchants' Capital* Scott P. Marler,2013-04-29 This study examines the crucial role of merchants in the rise and decline of New Orleans during the nineteenth century      **Merchants and Capitalists** David M. Gordon,1985      *Fruits of Merchant Capital* Elizabeth Fox-Genovese,Eugene D. Genovese,1983

**Capitalism and Politics in Russia** Thomas C. Owen,2008-12-18 This monograph based largely on memoirs diaries archival documents and other primary sources represents a comprehensive social history of the Moscow merchants in the period between 1855 and 1905 The author first examines the essential aspects of traditional merchant culture in the early nineteenth century He then discusses the emergence of capitalist manufacturers and traders a group who implemented

modern business techniques in the 1840s without however adopting the political liberalism of the western bourgeoisie Committed to economic modernisation as a means of redressing Russia's humiliation in the Crimean War these merchants cooperated with sympathetic intellectuals in railroad management banking journalism and the struggle to gain tariff protection The study concludes with an analysis of the bourgeois class consciousness that resulted from the Moscow commercial industrial leaders conflicts with both the tsarist government and the militant labour movement during the Revolution of 1905 Owen contributes to discussions about the distinctive features of Russian social and economic development in the final years of the Russian Empire

**Peasants, Landlords and Merchants Capitalists**

Peter Kriedte,1983-09-08 Planting a Capitalist South Tom Downey,2006-02 Planting a Capitalist South effectively challenges the idea that commercial and industrial interests did little to alter the planter dominated political economy of the Old South By analyzing the interplay of planters merchants and manufacturers the author characterizes the South as a sphere of contending types of capitalists agrarians with land and slaves versus commercial and industrial owners of banks railroads stores and factories A revisionary study Planting a Capitalist South offers clear evidence of a burgeoning transition to capitalist society in the Old South

*Miners and Merchants in Bourbon Mexico 1763-1810*

D. A. Brading,1971-05-02 The aim of this study is to define that distinctive blend of enlightened despotism and entrepreneurial talent which created Bourbon Mexico The period 1763-1810 was a crucial and distinctive stage in the colonial history of Mexico Jose de G Ivez the dynamic minister of the Indies transformed the system of government and restructured the economy The ensuing golden age far from being the culmination of two hundred years of steady development sprang rather from a profound regeneration of the New World's Hispanic society The chief success of G Ivez's policy was the unprecedented mining boom which made Mexico the world's chief silver producer It was this silver boom which largely financed the revival of the political and economic power of the Spanish monarchy and in Mexico itself created a new aristocracy of merchant capitalists and silver millionaires

*The Trading World of the Tamil Merchant* Kanakalatha Mukund,1999 The book focuses on the changes in the trading world of the Tamil merchants in the southern Coromandel region with the arrival of European trading companies and the concomitant creation of European port enclaves and the rapid expansion of demand for Coromandel cotton textiles The author uses impressive range of original sources literary inscriptional and archival to cover a long period of history beginning with the maritime trade in the Sangam period to argue that the merchants evolved over the centuries into a distinct class of merchant capitalists with a conscious perception of their identity as an economic and social class

The Familial State

Julia Adams,2005 The seventeenth century was called the Dutch Golden Age Over the course of eighty years the tiny United Provinces of the Netherlands overthrew Spanish rule and became Europe's dominant power Eventually though Dutch hegemony collapsed as quickly as it had risen In The Familial State Julia Adams explores the role that Holland's great families played in this dramatic history She charts how family patriarchs who were at the time both state builders and

merchant capitalists shaped the first great wave of European colonialism which in turn influenced European political development in innovative ways On the basis of massive archival work Adams arrives at a profoundly gendered reading of the family power structure of the Dutch elite and their companies in particular the VOC or Dutch East India Company In the United Provinces she finds the first example of the power structure that would dominate the transitional states of early modern Europe the familial state This organizational structure is typified in her view by paternal political rule and multiple arrangements among the family heads

*A Brief History of Commercial Capitalism* Jairus Banaji, 2020-07-07 The rise of capitalism to global dominance is still largely associated by both laypeople and Marxist historians with the industrial capitalism that made its decisive breakthrough in 18th century Britain Jairus Banaji's new work reaches back centuries and traverses vast distances to argue that this leap was preceded by a long era of distinct commercial capitalism which reorganized labor and production on a world scale to a degree hitherto rarely appreciated Rather than a picture centred solely on Europe we enter a diverse and vibrant world Banaji reveals the cantons of Muslim merchants trading in Guangzhou since the eighth century the 3 000 European traders recorded in Alexandria in 1216 the Genoese Venetians and Spanish Jews battling for commercial dominance of Constantinople and later Istanbul We are left with a rich and global portrait of a world constantly in motion tied together and increasingly dominated by a pre industrial capitalism The rise of Europe to world domination in this view has nothing to do with any unique genius but rather a distinct fusion of commercial capitalism with state power

*Family Firms and Merchant Capitalism in Early Modern Europe* Thomas Max Safley, 2019-11-21 This fascinating study follows the fortunes of the H chstetter family merchant manufacturers and financiers of Augsburg Germany in the late fifteenth and early sixteenth centuries and sheds light on the economic and social history of failure and resilience in early modern Europe Carefully tracing the chronology of the family's rise fall and transformation it moves from the micro to the macro level making comparisons with other mercantile families of the time to draw conclusions and suggest insights into such issues as social mobility capitalist organization business techniques market practices and economic institutions The result is a microhistory that offers macro conclusions about the lived experience of early capitalism and capitalistic practices This book will be valuable reading for advanced students and researchers of economic financial and business history legal history and early modern European history

*Merchants and Society in Modern China* Tang Lixing, 2017-12-14 In ancient China as the lowermost class in the social hierarchy merchants were viewed as greedy and immoral commanding little respect But since the sixteenth century when China entered modern times with the sprout of capitalism merchants have become a strong force to transform the ancient society By absorbing methods of anthropology psychology geography and economics as well as cultural and genealogical studies this book explores the development and rise of the merchant in modern China To start with it examines the golden times of the merchant and the dilemmas facing them in the two millennia long traditional society where the pro agriculture and anti commerce policy was implemented With the economic

development merchant groups gradually came into being and formed a vibrant social class in the modern era Major merchant groups their psychological integration and the interaction between merchants and capitalism in China are specifically studied Also merchants role in the communal life is analyzed including their contribution to the making and expansion of modern communities which led to China s social transformation With a multi faceted description of Chinese merchants whose development interweaves with the transformation of the ancient country this book will appeal to scholars and students in economics history sociology and cultural studies Readers interested in Chinese culture and social history will also be attracted by it

**Corporations, Accounting, Securities Laws, and the Extinction of Capitalism**

Wm. Dennis Huber,2022-07-18 Ever since Marx the future of capitalism has been fiercely debated Marx and his followers predicted capitalism will end by violent overthrow while others prophesied its demise will be the result of collapsing under its own weight Still others argue that capitalism will not only continue to exist but continue to expand globally This book takes a distinctively different approach by presenting solid evidence that capitalism has already ended The author argues that corporate statutory law securities laws and generally accepted accounting principles have combined to cause the extinction of capitalists Without capitalists as owners of capital there can be no capitalism The book examines the factors that converged to contribute to and hasten the extinction of capitalists and thus of capitalism as an economic system in an ironic case of the law of unintended consequences The very things that were intended to promote protect and sustain capitalism are the things that caused its death It exposes the fallacy that capitalism as an economic system not only continues to exist but is expanding globally Capitalism is extinct and the social system constructed on capitalism as an economic system cannot be sustained This book will appeal to economists accountants historians political scientists lawyers and sociologists as well as students of those disciplines

Merchants and capitalists David M. Gordon,1979    Merchants and Colonialism Amiya

Kumar Bagchi,2018-12-13 Amiya Kumar Bagchi s Merchants and Colonialism is a landmark work in economic history and sociology The author shows us how colonial rule put traders and manufacturers under immense pressure forcing them to look for survival strategies in a changed economic environment This resulted in long term de industrialization and irreversible damage to traditional modes of production which had far reaching economic consequences for India after Independence

*Capitalism and Migration* Nestor Rodriguez,2023-01-01 This book explores the role of capital and labor migration in the expansion of the capitalist world system It presents comprehensive case studies on various historical periods of hegemony recognized by world system theory the Dutch hegemony 1625 1675 British hegemony 1815 1873 and US hegemony 1945 1970 Moreover the book identifies an earlier period of economic dominance in Western Europe when merchant bankers from Florence dominated the regional wool trade in the early thirteenth century In these four intervals of dominance i e from the medieval period to the late twentieth century capital and labor migration formed the basis of capitalist development in the hegemonic core states as well as in peripheral regions under their economic and political

influence In turn the book analyzes the migration patterns associated with the rise of hegemony from the perspectives of class relations between employers and workers technological advances at the workplace economic cycles and state policies on labor migration It concludes with a projection that heightened migration will continue to characterize the capitalist world system especially as many poor and displaced populations in peripheral regions resort to migration for survival Accordingly it appeals to scholars in the fields of politics sociology history anthropology and economics who are interested in globalization and world system analysis
