**Merchants and Masterpieces** Calvin Tomkins, 1970      The Park and the People Roy Rosenzweig, Elizabeth Blackmar, 1992 Delineate the politicians business people artists immigrant laborers and city dwellers who are the key players in the tale In tracing the park s history the writers also give us the history of New York They explain how squabbles over politics taxes and real estate development shaped the park and describe the acrimonious debates over what a public park should look like what facilities it should offer and how it should accommodate the often incompatible      Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible      Museums in Motion Edward P. Alexander, Mary Alexander, Juilee Decker, 2017-02-23 Here is a complete introduction to the history of museums types of museums and the key roles that museums play in the twenty first century Following an introductory chapter looking at what a museum is today Part I looks at the history and types of museums art and design museums natural history and anthropology museums science museums history museums historic houses interpretation centers and heritage sites botanical gardens and zoos children s museums The second part of the book explores the primary functions of museums and museum professionals to collect to conserve to

exhibit to interpret and to engage to serve and to act The final chapter looks at the museum profession and professional practices Throughout emphasis is on museums in the United States although attention is paid to the historical framing of museums within the European context The new edition includes discussions of technology access and inclusivity woven into each chapter a list of challenges and opportunities in each chapter and Museums in Motion Today vignettes spread throughout the volume in which museum professionals provide their perspectives on where museums are now and where they are going More than 140 images illustrate the volume

Philanthropy, Patronage, and Civil Society Thomas Adam, 2004-02-12 In *Philanthropy, Patronage, and Civil Society* Thomas Adam has assembled a comparative set of case studies that challenge long held and little studied assumptions about the modern development of philanthropy Histories of philanthropy have often neglected European patterns of giving and the importance of financial patronage to the emergence of modern industrialized societies It has long been assumed for example that Germany never developed civic traditions of philanthropy as in the United States In truth however 19th century German museums art galleries and social housing projects were not only privately founded and supported they were also blueprints for the creation of similar public institutions in North America The comparative method of the essays also reveals the extent to which the wealthy classes on both sides of the Atlantic defined themselves through their philanthropic activities Contributors are Thomas Adam Maria Benjamin Baader Karsten Borgmann Tobias Brinkmann Brett Fairbairn Eckhardt Fuchs David C Hammack Dieter Hoffmann Simone L. *The Met and the Masses in Postwar America* Mitchell B. Frank, 2022-11-17 This book explores the collaborations during the mid 20th century between the Metropolitan Museum of Art and the Book of the Month Club Between 1948 and 1962 the two institutions collaborated on three book projects The Metropolitan Museum of Art Miniatures 1948 1957 The Metropolitan Seminars in Art 1958 60 and a print reproduction of Rembrandt's Aristotle Contemplating the Bust of Homer 1962 bringing art from the Met's collections right into the homes of subscribers The Met and the Masses places these commercial enterprises in a variety of contemporary and historical contexts including the relation of cultural education to democracy in America the history of the Met as an educational institution the rise of art education in postwar America and the concurrent transformation of the home into a space that mediated familial privacy and the public sphere Using never before published archival material the book demonstrates how the Met sought to bring art to the masses in postwar America whilst upholding its reputation as an institution of high culture It is essential reading for scholars researchers and curators interested in the history of modern art museum and curatorial studies arts and cultural management heritage studies as well as the history of art publications

**Art Wars** Rachel N. Klein, 2020-06-19 A study of three controversies that illuminate the changing cultural role of art exhibition in the nineteenth century From the antebellum era through the Gilded Age New York City's leading art institutions were lightning rods for conflict In the decades before the Civil War art promoters believed that aesthetic taste could foster national unity and assuage urban conflicts by the 1880s such hopes had faded and the taste for art assumed more personal connotations associated with consumption and domestic decoration Art Wars chronicles three protracted public battles that marked this transformation The first battle began in 1849 and resulted in the downfall of the American Art Union the most popular and influential art institution in North America at mid century The second erupted in 1880 over the Metropolitan Museum's massive collection of Cypriot antiquities which had been plundered and sold to its trustees by the man who became the museum's first paid director The third escalated in the mid 1880s and forced the Metropolitan Museum to open its doors on Sunday the only day when working people were able to attend In chronicling these disputes Rachel N Klein considers cultural fissures that ran much deeper than the specific complaints that landed protagonists in court New York's major nineteenth century art institutions came under intense scrutiny not only because Americans invested them with moral and civic consequences but also because they were part and parcel of explosive processes associated with the rise of industrial capitalism Elite New Yorkers spearheaded the creation of the Art Union and the Metropolitan but those institutions became enmeshed in popular struggles related to slavery immigration race industrial production and the rights of working people Art Wars examines popular engagement with New York's art institutions and illuminates the changing cultural role of art exhibition over the course of the nineteenth century

organized its membership and fundraising on the model of German art museums The process of cultural borrowing and intercultural transfer shaped urban landscapes with the building of new libraries museums and social housing projects An important contribution to the relatively new field of transnational history this book establishes philanthropy as a prime example of the conversion of economic resources into social and cultural capital      **Academic American Encyclopedia**
