**Mergers in Perspective** Yale Brozen,1982 Discusses the appropriateness of mergers such as acquisitions of Conoco and Marathon Oil Corporation and of their impact on the American economy The author argues in favour of a natural government merger policy He believes that mergers do not result in an excessive concentration of the American economy that the present restrictive policy is at odds with that of the countries with which the US competes that mergers may allow American companies to become large enough to compete effectively in international trade and improve the management of poorly managed assets
