### **Defensive Architecture and the Depopulation of the Mesa Verde Region,**

**Utah-Colorado in the Thirteenth Century A.D.** Radosław Palonka, 2011 The thirteenth century A.D. was a time of many changes and reorganization in the ancient Pueblo world in the Mesa Verde region Still unresolved are the causes of the migration of Pueblo people from the Mesa Verde region to the south and southeast in the end of the century The theories most cited and most supported by scientific data include environmental changes increasing conflict and violence social changes and the attraction of a new cult or ideologies from the south However it seems that none of these theories can fully explain the total depopulation of the region One reason often cited for the depopulation of the area is increasing conflict and violence Evidence of conflict is clearly visible archaeologically sites located in places difficult to access defensive buildings and settlement layouts human remains with evidence of a violent death and rock art depicting violent interactions During the thirteenth century A.D. many types of defensive architecture including towers underground tunnels connecting structures in a settlement loopholes and massive stone walls that partly or fully enclosed villages were constructed in the central Mesa Verde region These architectural changes were associated with population aggregation and relocation during the thirteenth century most people probably lived in large settlements situated such that they were difficult to access and easy to defend In many villages water sources were secured within the boundary of the settlement or were at least nearby However it is difficult to determine whether the defensive architecture and defensible locations were not enough of an obstacle against possible attackers as Pueblo Indians emigrated from the Mesa Verde region near the end of the thirteenth century A.D. into what are now northern and central Arizona and New Mexico

*Ancient Architecture of the Southwest* William N. Morgan, 1994-01-01 During more than a thousand years before Europeans arrived in 1540 the native peoples of what is now the southwestern United States and northern Mexico developed an architecture of rich diversity and beauty Vestiges of thousands of these dwellings and villages still remain in locations ranging from Colorado in the north to Chihuahua in the south and from Nevada in the west to eastern New Mexico This study presents the most comprehensive architectural survey of the region currently available Organized in five chronological sections that include 132 professionally rendered site

drawings the book examines architectural evolution from humble pit houses to sophisticated multistory pueblos. The sections explore concurrent Mogollon, Hohokam and Anasazi developments as well as those in the Salado, Sinagua, Virgin River, Kayenta and other areas and compare their architecture to contemporary developments in parts of eastern North America and Mesoamerica. The book concludes with a discussion of changes in Native American architecture in response to European influences.

**Mesa Verde** Josie Hertz, High above the Four Corners region of the American Southwest where Colorado's mesas stretch toward distant horizons painted in desert pastels lies one of North America's most remarkable archaeological treasures. Mesa Verde Spanish for green table rises from the surrounding landscape like a massive natural fortress its flat top crowned with ancient ruins that speak to more than seven centuries of continuous human habitation. This extraordinary landscape where sandstone cliffs shelter elaborate stone cities built directly into the rock faces represents the culmination of Ancestral Puebloan civilization and stands as testament to human ingenuity in one of the continent's most challenging environments. The story of Mesa Verde begins not with the famous cliff dwellings that capture modern imagination but with the gradual adaptation of ancient peoples to the high desert environment of the Colorado Plateau. Around 550 CE small groups of farmers and hunters began establishing permanent settlements on the mesa tops drawn by reliable water sources, fertile soil pockets and the defensive advantages offered by the elevated terrain. These early inhabitants known today as the Ancestral Puebloans but formerly called the Anasazi represented the continuation of cultural traditions that stretched back thousands of years into the prehistoric Southwest. The environmental setting of Mesa Verde profoundly shaped every aspect of life for its ancient inhabitants. Situated at an elevation of over 8 000 feet above sea level the mesa experiences a high desert climate characterized by dramatic temperature variations limited precipitation and a short growing season that challenged even the most skilled farmers. Winter temperatures can plummet well below freezing while summer days often exceed 90 degrees Fahrenheit creating extreme conditions that demanded sophisticated adaptation strategies from human communities seeking to establish permanent settlements in this demanding landscape.
