Message From Laura:

Discourse of Text Messaging Caroline Tagg, 2012-05-17 Understanding the discourse of text messaging has profound implications for society SMS text messaging has impacted considerably on how we communicate with others Negative sometimes alarmist media coverage continues to fuel debate surrounding its damaging effects on language and literacy yet these portrayals tend to be based on extreme or fictionalised accounts of text messaging What kind of language do people really use when they text Drawing on a range of academic sources from various fields this book describes the language used in a corpus of over 11 000 text messages as yet the largest collection in the UK In particular the book shows how the discourse of text messaging is shaped by users often creative responses to the functions and constraints of the medium This is an essential book for upper level undergraduates and postgraduates studying discourse analysis as well as educators wanting to understand this important new form of discourse
