Schwab,2002 The Song of Songs is a collection of love poems written to explore and celebrate human love Within the positive endorsement of human sexuality and affection lies a secondary but important element of sapiential instruction the conception of love as dangerous powerful threatening to marriage and potentially harmful to the individual lover This reading of the Song is set in the context of the Old Testament Jewish traditional writings and the New Testament It is discovered that this understanding of love is constant throughout this literature and especially characteristic of wisdom texts Love while joyously celebrated is also a dangerous threat to human life a power that must be respected
