Messerschmitt Me 262 Walter J. Boyne, 1997 *Messerschmitt Me 262 Arrow to the Future* tells the dramatic story of the Me 262's combat career as a fascinating chain of events in which planning luck and even blind stupidity played important roles. Even by today's engineering standards magnificent is the only word to describe the effort to bring the plane's jet engines which eclipsed the performance of all contemporary aircraft from the laboratory to production in an amazingly short time. *Arrow to the Future* also tells the story of the people who flew the Me 262 in combat. Their complete accounts bring their missions to life and set the plane in the historical context of the war. The German narratives are complemented by the accounts of Americans who flew against the Me 262 for instance the team of crack USAAF pilots known as Watson's Whizzers who literally stole a fleet of jet aircraft from German airfields at the end of the war. Also described are the postwar efforts to test and preserve the Me 262. Included is a description of the efforts to obtain one of these aircraft for display at the National Air and Space Museum and the painstaking efforts by the team at the Smithsonian's Paul E Garber Facility for Preservation Restoration and Storage to restore the Me 262 to its pristine condition. This new reprint edition is lavishly illustrated with more than 100 photographs including operational photos from World War II color views of the cockpit and interior and exterior shots of the restored Me 262. In addition to the striking photographs there are expert technical drawings, cutaway illustrations and equipment and conversion tables. Walter J. Boyne is the author of many books including *The Smithsonian Book of Flight* *The Leading Edge Boeing B 52 A Documentary History* and *Phantom in Combat* as well as the novels *The Wild Blue* *Trophy for Eagles* and *Air Force Eagles*.

[The Messerschmitt Bf 110 in Color Profile](#) John Vasco, 2005

This in depth work on the Messerschmitt Bf 110 variants B through G provides for the first time a comprehensive set of colored line drawings showing the changes as this Luftwaffe fighter evolved. For every line drawing there is an accompanying photograph and explanatory text. This work takes you through the pre war period the Polish campaign the war in northern Europe and western Europe in the spring of 1940 the Battle of Britain the Russian front the Mediterranean theatre Defence of the Reich and night fighters. Lesser known sub variants are also featured such as the Messerschmitt 110s used in transport glider towing duties. A comprehensive appendix takes the reader through the changes to each sub variant by way of cutaway drawings. The colored artwork by Fernando Estanislau is simply breathtaking and establishes him immediately in the top ranks of aviation artists. A must have for the Luftwaffe enthusiast and modeller alike.

[Messerschmitt Bf 109 T](#) Marek Murawski, 2009-12-15

Free masking foil and decal sheets for modelers. Lists of scores pilot reports and portraits color profile artworks and maps. Lavishly illustrated this book covers the combat history of the Messerschmitt Bf 109T. The Messerschmitt Bf 109 was a German World War II fighter aircraft designed by Willy Messerschmitt in the early 1930s. It was one of the first true modern fighters of the era. Having gone through its baptism of fire in the Spanish Civil War the Bf 109 was still in service at the dawn of the jet age at the end of World War II. In the fall of 1938 the Technische Amt RLM Technical Office of

the Reichsluftfahrtministerium or State Ministry of Aviation requested that Messerschmitt's Augsburg design bureau draw up plans for a carrier borne version of the Bf 109E fighter to be designated Bf 109T the T standing for Träger or Carrier. The resulting aircraft were nicknamed Toni by their pilots. Content includes carrier Graf Zeppelin and her aircraft operational service including its new role over the North Sea and comes with free masking foil and decals. About the Series Air Battles is a series of books focusing on World War II air battles of specific aircraft and units. Each volume contains information on the planes involved, lists of scores, pilot reports and portraits, color profile artwork and maps.
