Metallic Minerals On The Deep Seabed:

Metallic Minerals on the Deep Seabed G. A. Gross, C. R. McLeod, 1987 Technology developed in recent years has made it possible to explore mineral occurrences on the deep seabed that are analogous to many mineral deposits mined on land. This paper reviews the main types of occurrences on the deep seabed, their geological setting in relation to major geological features and their proximity to land areas. Brief notes on the mineral occurrences describe their type and depositional environment. A world map shows islands and continents areas 370 km from land, major tectonic features, the distribution of manganese nodules and crusts, various types of metalliferous sediments and crusts, and areas where hydrothermal processes are now or have been active on the seafloor.

International Law and Corporate Actors in Deep Seabed Mining Joanna Dingwall, 2021 This book addresses the unresolved legal challenges which the increasing role of private corporate actors in deep seabed mining will raise in the coming years. It assesses the tension between corporate commercial interests and the achievement of the common heritage of mankind under the United Nations Convention on the Law of the Sea.

European Yearbook of International Economic Law 2018 Marc Bungenberg, Markus Krajewski, Christian J. Tams, Jörg Philipp Terhechte, Andreas R. Ziegler, 2019-02-25 Volume 9 of the EYIEL focusses on natural resources law understood as a special area of international economic law. In light of increasing conflicts over access to and the use of natural resources and of their impact on political, social and environmental aspects, the contributions of this volume analyse to which extent international economic law can contribute to the sustainable exploitation, management and distribution of natural resources. The volume collects contributions on general principles of natural resources law, the importance of natural resources for trade, investment and European economic law, as well as analyses of particular sectors and areas including fracking, timber, space and deep seabed mining and natural resources in the arctic region. In its section on regional developments, EYIEL 9 addresses two regional integration systems which are usually not at the centre of public interest but which deserve all the more attention due to their special relations with Europe: The Eurasian Economic Union and the Caribbean Community (CARICOM). Further EYIEL sections address recent WTO and investment case law, as well as developments at the IMF. The volume also contains review essays of important recent books in international economic law and other aspects of international law which are connected to international economic relations.
