Metameditations Studies In Descartes:

Descartes-Arg Philosophers Margaret Dauler Wilson, 2013-10-08 First Published in 1999 The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought Each book constitutes a detailed critical introduction to the work of a philosopher of major influence and significance In this volume the author offers what she believes to be a somewhat different over all reading of Descartes philosophy and particularly of the Meditations from other commentators especially those written in English

Meta-meditations: Studies in Descartes Alexander Sesonske, Brice Noel Fleming, 1965 Descartes Meditations probably rivals Plato's Republic as the work most frequently read or recommended as an introduction to philosophy Its qualifications for this purpose are obvious it is important relatively short well written and seems in the beginning at least readily understandable One of the most influential works in the history of Western thought the Meditations has often been considered the keynote of modern philosophy This collection of critical discussions is intended primarily for use by students reading Descartes in an introductory philosophy course These essays will lead a reader to explore several of the problems which emerge when Meditations is subjected to careful scrutiny Not all the problems raised by the Meditations are examined but they provide the means to transform the work from a merely historical document into a nest of currently interesting questions

A Historical Introduction to the Philosophy of Science John Losee, 2001-03-01 John Losee provides a balanced and engaging survey of the development of views about scientific method Ideal for those coming to the subject for the first time this fully updated new edition incorporates discussion on contemporary debates including philosophy of biology normative naturalism theory appraisal experimental practice and scientific realism Concise profiles of the major philosophers discussed within the text are provided including Aristotle Galileo Newton Whewell Hempel and Kuhn

Augustine and Modernity Michael Hanby, 2003-12-08 Augustine and Modernity is a fresh and challenging addition to current debates about the Augustinian origins of modern subjectivity and the Christian genesis of Western nihilism It firmly rejects the dominant modern view that the modern Cartesian subject as an archetype of Western nihilism originates in Augustine's thought Arguing that most contemporary interpretations misrepresent the complex philosophical relationship between Augustine and modern philosophy particularly with regard to the work of Descartes the book examines the much overlooked contribution of Stoicism to the genealogy of modernity producing a scathing riposte to commonly held versions of the continuity thesis Michael Hanby identifies the modern concept of will that emerges in Descartes work as the product of a notion of self more proper to Stoic theories of immanence than to Augustine's own rigorous understandings of the Trinity creation self and will Though Augustine's encounter with Stoicism ultimately resulted in much of his teaching being transferred to Descartes and other modern thinkers in an adulterated form Hanby draws critical attention to Augustine's own disillusionment with Stoicism and his interrogation of Stoic philosophy in the name of Christ and the Trinity Representing a new school of theology willing to engage critically with other disciplines and to

challenge their authority Augustine and Modernity offers a comprehensive new interpretation of De Trinitate and of Augustinian concepts of will and soul Revealing how much of what is now thought of as Augustinian in fact has its genealogy in Stoic asceticism it interprets the modern nihilistic Cartesian subject not as a logical consequence of a true Christian Trinitarian theology but rather of its perversion and abandonment

Mind World David Woodruff Smith, 2004-03-15 This collection explores the structure of consciousness and its place in the world or inversely the structure of the world and the place of consciousness in it Amongst the topics covered are the phenomenological aspects of experience dependencies between experience and the world and the basic ontological categories found in the world at large Developing ideas drawn from historical figures such as Descartes Husserl Aristotle and Whitehead the essays together demonstrate the interdependence of ontology and phenomenology and its significance for the philosophy of mind

Socrates' Children Trudy Govier, 1997-08-06 How do Humans Think How should we think Almost all of philosophy and a great deal else depends in large part on the answers that we provide to such questions Yet they are almost impossible to deal with in isolation notions about nature of thought are almost bound to connect with metaphysical notions about where ideas come from with notions about appropriate arenas for certainty doubt and belief and hence with moral and religious ideas The Western tradition of thinking about thinking takes shape with Socrates among the other important strands covered in this book are Descartes recipe for discovering truth through systematic doubt Hume's notion that all our ideas are copies of sense impressions Wollstonecraft's introduction of the perspective of gender into such questions and Wittgenstein's claim that much of the traditional terrain of Western philosophy should be thought of as the proper domain only of linguistic assertion possessing no content beyond the words With each philosopher and school of thought dealt with Govier shows how ideas about thinking connect to the other elements of the particular philosophy and brings to life the social and intellectual context that the ideas spring from *Socrates Children* is thus not only an investigation of notions of thinking and knowing in Western culture it is a selective general history of much of Western philosophy from a unique and fascinating perspective

Hindu and Buddhist Ideas in Dialogue Irina Kuznetsova, Jonardon Ganeri, Chakravarthi Ram-Prasad, 2016-04-22 The debates between various Buddhist and Hindu philosophical systems about the existence definition and nature of self occupy a central place in the history of Indian philosophy and religion These debates concern various issues what self means whether the self can be said to exist at all arguments that can substantiate any position on this question how the ordinary reality of individual persons can be explained and the consequences of each position At a time when comparable issues are at the forefront of contemporary Western philosophy in both analytic and continental traditions as well as in their interaction these classical and medieval Indian debates widen and globalise such discussions This book brings to a wider audience the sophisticated range of positions held by various systems of thought in classical India

Descartes Willis Doney, 1967

Descartes' Philosophy of Science Desmond M. Clarke, 1982 This

major new study of Descartes explores a number of key issues including his use of experience and reason in science the metaphysical foundations of Cartesian science the Cartesian concept of explanation and proof and an empiricist interpretation of the *Regulae* and the *Discourse* Dr Clarke argues that labels such as empiricism and rationalism are useless for understanding Descartes because at least in his scientific methodology he is very much an Aristotelian for whom reflection on ordinary experience is the primary source of scientific hypotheses Descartes traditionally has been presented as a classic example of rationalism in science especially by philosophers who concentrated their attention on the *Meditations* or the *Discourse* A different perspective is gained by reading Descartes as a practicing scientist and by examining his scientific work and correspondence with other seventeenth century scientists These texts suggest that the author relies very much on experience and in some cases on scientific experiments to support his theories or to dispute those of others Descartes scientific practice is even consistent with a less rationalistic interpretation of the *Regulae* and the *Discourse* than is normally defended
