Metaphor In Educational Discourse:

Metaphor in Educational Discourse Lynne Cameron, 2003-03-13 Metaphor in Educational Discourse is a superb piece of applied linguistics research that integrates Vygotsky's theory of concepts with current work on metaphor into a coherent framework for investigating how teachers and learners negotiate figurative language in order to promote development in the classroom setting. In what is likely to become the standard for future studies in this area, Lynne Cameron meticulously demonstrates the central role of linguistic metaphors in classroom learning designed to lead learners to a deeper understanding of complex mathematical and scientific concepts. James P. Lantolf, Professor of Applied Linguistics, The Pennsylvania State University. This book reports research into metaphor in use with school students. The setting for the research is a UK school and the participants are around ten years old with their first language well established but still developing concepts and understandings. Close examination of a corpus of classroom spoken discourse reveals how metaphor is employed by their teachers not just in explaining ideas but in managing and mediating the activity of the classroom and the learning of the students. Particular issues discussed include the problems of identifying metaphors in spoken discourse, the conventionalism of metaphors in the discourse of socio-cultural groups, and how a socio-cultural approach can account for systematicity in metaphor use. *Elicited Metaphor Analysis in Educational Discourse* Wan Wan, Graham Low, 2015-07-02

The ability to recognise, discuss and evaluate one's educational beliefs and working practices in metaphoric terms has for several years been seen as a highly valuable tool for increasing self-awareness, facilitating learning or teaching and/or predicting behaviour. This is the first edited book solely devoted to the topic of researching elicited metaphor in education and brings together key researchers from China, Poland, Puerto Rico, South America, UK and USA. The 12 chapters involve overviews and state-of-the-art articles, articles focussing on methodology and validation, as well as reflections on the effectiveness of techniques and research reports of recent empirical studies. The bulk of the articles relate to literacy, L1 and L2 and teacher education, but science education is also addressed. The book offers useful models for academics, professionals and PhD students in these areas and provides solutions for improving the validity of elicited metaphor techniques in educational research. **Metaphors of Education** William Taylor, 1984 **Rhetoric and Educational Discourse** Richard

Edwards, Katherine Nicoll, Nicky Solomon, Robin Usher, 2013-02-01 Educational policy is often dismissed as simply rhetoric and a collection of half-truths. However, this is to underestimate the power of rhetoric and the ways in which rhetorical strategies are integral to persuasive acts. Through a series of illustrative chapters, this book argues that rather than something to be dismissed, rhetorical analysis offers a rich and deep arena in which to explore and examine educational issues and practices. It adopts an original stance in relation to contemporary debates and will make a significant contribution to educational debates in elucidating and illustrating the pervasiveness of persuasive strategies in educational practices. *Rhetoric and Educational Discourse* is a useful resource for postgraduate and research students in education and applied

linguistics The book will also be of interest to academics and researchers in these fields of study and those interested in discursive approaches to research and scholarship **Metaphor Analysis in the Educational Discourse** Hong-bo Zheng, Wen-juan Song, 2010 Metaphor analysis is based on the belief that metaphor is a powerful linguistic device because it extends and encapsulates knowledge about the familiarity and unfamiliarity Metaphor analysis has been adopted in the educational discourse The paper categorizes the previous relevant research into 3 interactions between learners and institutions teachers perceptions of teaching and learners beliefs of learning And a critical review of 3 kinds of studies and suggestions for further research are ensued *Philosophical Issues In Education* Cornel M. Hamm, 2003-09-02 First published in 1989 Routledge is an imprint of Taylor Francis an informa company Metaphor in Communication, Science and Education Francesca Ervas, Elisabetta Gola, Maria Grazia Rossi, 2017-08-07 This collection of papers presents some recent trends in metaphor studies that propose new directions of research on the embodied cognition perspective The overall volume in particular shows how the embodied cognition still remains a relevant approach in a multidisciplinary research on the communicative side of metaphors by focusing on both comprehension processes in science as well as learning processes in education **Metaphors of Education** William Taylor, 1984 Reason and Education H. Siegel, 2012-12-06 Israel Scheffler is the pre eminent philosopher of education in the English speaking world today This volume collects seventeen original invited papers on Scheffler s philosophy of education by scholars from around the world The papers address the wide range of topics that Scheffler s work in philosophy of education has addressed including the aims of education cognition and emotion teaching the language of education science education moral education religious education and human potential Each paper is followed by a response from Scheffler himself The collection is essential reading for anyone concerned with contemporary scholarship in philosophy of education or with the place of this singularly important author in it

Educational Perspectives , 2007 **Metaphor and Reconciliation** Lynne Cameron, 2012-01-04 Sixteen years after her father was killed by an IRA bomb Jo Berry had her first conversation with the man responsible She had made a long journey walking the footsteps of the bombers as she put it determined not to give in to anger and revenge but to try to understand his motivations and perspective Her preparedness to meet Pat Magee opened up a path to empathy that developed through their conversations over the following years This book studies their growing understandings of each other by focusing on the rich networks of metaphors that appear in their conversations and how these evolve in the process of reconciliation The innovative research method reported in a rigorous but accessible style together with the rich and often poignant data make this book a valuable addition to the study of metaphor and discourse In uncovering the development of empathy between these two extraordinary people Cameron illuminates the moral necessity and the potential rewards in trying to imagine the world and mind of the Other Implications are drawn for how mediators in reconciliation contexts might make positive use of metaphor in supporting the dynamics of empathy **Forging Connections in Early Mathematics**
