**Abstract:** All We know that metaphysical Poetry came into existence in 17th century during early in the Jacobean age. John Donne is considered one of the most remarkable literary figures and the founder of the metaphysical school of poetry. Metaphysical Poetry was a reaction against the conventional poetry of the spenserians. In the present research paper, I want to explain a beautiful analysis of metaphysical qualities of John Donne poetry. It is a real fact that when we read the poetry of Donne we often feel unique qualities from other poets' poetry in it. This unique quality is called metaphysical. We can see the poetry of John Donne full of poetic thought as an argument, fine conceits, imaging and logics, obscurity. Blending of passion, thoughts and intellectual poetic wit. In the last we can say that John Donne was not a poet of common man, he reveals only his own concept, logics, Passions and theories of dogmatic reassigning.

**Keywords:** Early Jacobean Period, Metaphysical Poetry, Donne's Poetry, Qualities of Donne's Poetry.

1. **Introduction :** John Donne was a renowned poet of his time. He deeply studied about world and religious books. In his poems worldly taste and eternal taste are intermixed. He gave a new turn to style of poetry. His poetry is a reaction against the conventional poetry of the followers of Spenser. A unique description of the emotions and Passions led Donne to be a Metaphysical poet<sup>1-3</sup>. His poetry effects on the metaphysics.
2. **Early Jacobean Period:** It was a period in Britain during the reign of King James I and it was a time of great uncertainty. Two distinct forms of Poetry originated during this period. First, cavalier poets and their poetry. They were Richard Lovelace, Thomas Carew, John Suckling. Second, Metaphysical poetry and Poets. They were John Donne, George Herbert, Abraham Cowley and Andrew Marvell. Donne is called the monarch of wit and father of Metaphysical poetry. He became famous and his greatness mainly rests on the Elegies, The satires, The Anniversaries, songs and Sonnets.
3. **Meaning of Metaphysical Poetry:** Metaphysical word is made with two words. The first word is meta and second word is physical: Meta means "To beyond" and physical means. "Physical nature" so metaphysical means. "To beyond physical "nature" Thus the poetry which is beyond the limits and requirements of Physical nature. That is called metaphysical poetry.
4. **Metaphysical poetry :** It is a real fact that Donne was tired with the tradition style of tactsy so he used a new style in his poetry. He used uncommon comparison in his poetry. So his poetry is the result of scholarly mind. Metaphysical poetry has many characteristics as fantastic logics and imagery, conceits, love philosophy, comparisons uncommon and obscurity of language etc.

Women in the History of Analytic Philosophy Jeanne Peijnenburg, Sander Verhaegh, 2023-01-01 This book contains a selection of papers from the workshop Women in the History of Analytic Philosophy held in October 2019 in Tilburg the Netherlands It is the first volume devoted to the role of women in early analytic philosophy It discusses the ideas of ten female philosophers and covers a period of over a hundred years beginning with the contribution to the Significs Movement by Victoria Lady Welby in the second half of the nineteenth century and ending with Ruth Barcan Marcus's celebrated version of quantified modal logic after the Second World War The book makes clear that women contributed substantially to the development of analytic philosophy in all areas of philosophy from logic epistemology and philosophy of science to ethics metaphysics and philosophy of language It illustrates that although women's voices were no different from men's as regards their scope and versatility they had a much harder time being heard The book is aimed at historians of philosophy and scholars in gender studies

Chapman, 2013-03-18 This first book length study of the work and life of L Susan Stebbing relates the development of her thought to the philosophical social and political background of her life It also assesses Stebbing's contribution in the light of developments both in analytic philosophy and in linguistics in the decade since her death

**Analytic Philosophy** Michael Beaney, 2017-11-16 Originating in the pioneering work of Gottlob Frege Bertrand Russell G E Moore and Ludwig Wittgenstein in the four decades around the turn of the twentieth century analytic philosophy established itself in various forms in the 1930s After the Second World War it developed further in North America in the rest of Europe and is now growing in influence as the dominant philosophical tradition right across the world from Latin America to East Asia In this Very Short Introduction Michael Beaney introduces

some of the key ideas of the founders of analytic philosophy by exploring certain fundamental philosophical questions and showing how those ideas can be used in offering answers. Considering the work of Susan Stebbing he also explores the application of analytic philosophy to critical thinking and emphasizes the conceptual creativity that lies at the heart of fruitful analysis. Throughout Beaney illustrates why clarity of thinking, precision of expression and rigour of argumentation are rightly seen as virtues of analytic philosophy.

**Knowledge First** J. Adam Carter, Emma C. Gordon, Benjamin W. Jarvis, 2017 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years. Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e.g. justification, belief but rather that these and other notions should be analysed in terms of the concept of knowledge. This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy. The contributors' essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind, the philosophy of perception, ethics and action theory.

**Knowledge First Approaches in Epistemology and Mind** aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project.

**The Facts in Logical Space** Jason Turner, 2016 Philosophers have long been tempted by the idea that objects and properties are abstractions from the facts. But how is this abstraction supposed to go? If the objects and properties aren't already there, how do the facts give rise to them? Jason Turner develops and defends a novel answer to this question. The facts are arranged in a quasi geometric logical space and objects and properties arise from different quasi geometric structures in this space.

**How the Universe Operates** M J Baker, 2023-12-08 Why do the heavenly bodies behave in a contrary fashion to what we are familiar with on earth? Before a wheel can turn we must ensure rim is joined to axle; before a couple can dance in circle their hands must be joined. In contrast the planets circle the sun and the moons circle the planets without any securing mechanism and so precisely that their movements can be predicted to a millisecond. Again why is it that released from the effects of gravity, molten matter like water or molten lead forms spontaneously into tiny globes copying the form found in stars, planets and the sun? Are the tides satisfactorily explained by the thesis of gravitational pull of moon and sun? If so why does modern science have such difficulty reconciling the relative influences of these two bodies? What sort of reality is light and why is the speed of light fixed?
