Metascientific Queries Mario Augusto Bunge, 1969 **Metascience and Politics** A. James Gregor, 2020-03-25 A central problem in political inquiry is the conceptual and linguistic informality of political science For most of its history the discipline has been largely pursued with the analytic and logical machinery of ordinary language Likewise there has been little effort to standardize how language is used or to systematize theoretical procedures to insure methodological uniformity In an effort to better understand and defend the research processes that attend sustain and foster the systematic credibility of political science Gregor argues a special conceptual language is needed to enhance the rigor replicability articulation and interpretation of political science's empirical findings Gregor reviews the conceptual inventory of the social sciences in general with particular emphasis on distinctions between descriptive theoretical and normative language He analyzes what might count as objectivity and truth in a given set of circumstances in an effort to standardize how political scientists make such distinctions How theory and explanation might be assessed in less rigorous disciplines is also considered Gregor is opposed to the postmodernist tendency to use language games in the social sciences that purport to close the gaps separating the discourses of knowledge ethics and politics but do so at the expense of clarity rigor and objectivity In Gregor's view these alternative perspectives have exploited vagueness and ambiguity in order to accomplish what they consider to be their political tasks A substantial postscript to this edition traces some of the postmodernist perspectives to their origins in

the works of particular individuals and to their history in the thought of twentieth century Europe Metascience and Politics attempts to address all these issues with brevity and seriousness of purpose in order to provide a defensible rationale for the scientific character of social and political studies It will be of interest to political scientists sociologists philosophers and intellectual historians A James Gregor is professor of political science at the University of California at Berkeley and an adjunct professor at Command and Staff College U S Marine Corps University at Quantico Virginia He has also been awarded the Order of Merit by the President of the Italian Republic for his contribution to Italy as a nation through his published works He is the author of Giovanni Gentile Philosopher of Fascism Interpretations of Fascism Phoenix Fascism in Our Time and Marxism China and Development all published by Transaction Philosophical Questions Series ,1975 **Causality and Modern Science** Mario Bunge,1979-01-01 I regard it as a truly seminal work in this field Professor William A Wallace author of Causality and Scientific Explanation Non technical and clearly written this book focuses on the place of the casual principle in modern science The author defines the terminology describes various formulations examines the two primary critiques of causality and more *Representations of Vision* Andrei Gorea,1991-04-26 This stimulating volume on vision extends well beyond the traditional areas of vision research and places the subject in a much broader philosophical context The emphasis throughout is to integrate and illuminate the visual process The first three parts of the volume provide authoritative overviews on computational vision and neural networks on the neurophysiology of visual cortex processing and on eye movement research Each of these parts illustrates how different research perspectives may jointly solve fundamental problems related to the efficiency of visual perception to the relationship between vision and eye movements and to the neurophysiological codes underlying our visual perceptions In the fourth part leading vision scientists introduce the reader to some major philosophical problems in vision research such as the nature of ultimate codes for perceptual events the duality of psycho physics the bases of visual recognition and the paradigmatic foundations of computer vision research

Philosophy and Metaphilosophy Daniel James Hamilton,1963 *Metaphilosophical and Model Philosophical Questions* Mihirvikash Chakravarti,1972 On some metaphysical problems in the context of occidental philosophy **Dialogues on Perception** Bela Julesz,1995 An elucidation of ideas and insights generated by the paradigm of early vision presented in the form of dialogues The Philosophical Review Jacob Gould Schurman,James Edwin Creighton,Frank Thilly,Gustavus Watts Cunningham,1961 An international journal of general philosophy **The Conceptual Foundations of Contemporary Relativity Theory** John Cowperthwaite Graves,1971 The central conceptual idea of the contemporary theory of general relativity or geometrodynamics is the identification of matter with the structure of space time No entities foreign to space time like masses charges or independent fields are needed and physics thus becomes identical with the geometry of space time This idea implies a philosophical description of the universe that is monistic and organic characterized by an all encompassing interdependence of events Moreover it is an idea with deep roots in the history of philosophy For these

reasons the author of this important study strives to clarify these philosophical and historical issues before proceeding to the details of the physical theory of geometrodynamics Metatheory and Consumer Research Gerald Zaltman, Christian R. A. Pinson, Reinhard Angelmar, 1973 **The Logical Structure of Science** Pradip Kumar Sengupta, 1970 *Janua Linguarum*, 1971 **Dialectical Materialism** Ira Gollobin, 1986 A Guide to the Culture of Science, Technology, and Medicine Paul T. Durbin, 1984 **The Methodological Status of Grammatical Argumentation** Rudolf P. Botha, 1970 **An Ontogenic Study of the Use of Explanation and Related Verification Activity** John David Coie, 1968 Philosophy of Technology Jan-Kyrre Berg Olsen, Evan Selinger, 2007 A collection of short interviews based on 5 questions presented to prominent scholars in the field of philosophy of technology
