Method In Ancient Philosophy:

Method in Ancient Philosophy Jyl Gentzler, 1998 Method in Ancient Philosophy brings together fifteen new specially written essays by leading scholars on a broad subject of central importance It is characteristic of human beings that they direct their activities by reasoning Methods of reasoning even toward the same ends vary Self conscious reflection on the methods of reasoning marks the beginning of philosophy in the West examination of how the ancient Greeks reasoned and how they thought about methods of reasoning helps us to see how they came to hold the views they did and how we have come to think as we do For the views of the ancients have had a considerable influence upon our own assumptions about the demarcations between different kinds of enquiry and the sorts of methods that are appropriate for them The aims of the volume are thus both exegetical and philosophical Most of the essays focus on Socrates Plato or Aristotle but earlier and later ancient philosophy is brought into the picture by essays on Eleatic and Epicurean thought *Method and Metaphysics* Jonathan Barnes, 2011-10-06 Method and Metaphysics presents twenty six essays in ancient philosophy by Jonathan Barnes one of the most admired and influential scholars of his generation The essays span four decades of his career and are drawn from a wide variety of sources many of them will be relatively unknown even to specialists in ancient philosophy Several essays are now translated from the original French and made available in English for the first time others have been substantially revised for republication here The volume opens with eight essays about the interpretation of ancient philosophical texts and about the relationship between philosophy and its history The next five essays examine the methods of ancient philosophers The third section comprises thirteen essays about metaphysical topics from the Presocratics to the late Platonists This collection will be a rich feast for students and scholars of ancient philosophy **Ancient Concepts of Philosophy** William Jordan, 2005-08-04 First published in 1993 Routledge is an imprint of Taylor Francis an informa company The Method of Hypothesis and the Nature of Soul in Plato's Phaedo John Palmer, 2021-02-11 This study of Plato's Phaedo promotes better understanding of its arguments for the soul's immortality by showing how Plato intended them not as proofs but as properly dialectical arguments functioning in accordance with the method of hypothesis Unlike the argument for the soul's immortality in the Phaedrus which does seem intended as a proof the Phaedo arguments are proceeding toward the first principles that could serve as the basis for a proof the most important being an account of the soul's own essential nature This study attends to the substantial progress the Phaedo makes toward such an account It also considers Socrates' epistemic situation in the dialogue and the problem of whether his confidence in the face of death is misplaced if his arguments have not been proofs before considering how the concluding myth draws together several of the dialogue's main themes **Aristotle on Method and Metaphysics** E. Feser, 2013-07-12 Aristotle on Method and Metaphysics is a collection of new and cutting edge essays by prominent Aristotle scholars and Aristotelian philosophers on themes in ontology causation modality essentialism the metaphysics of life natural theology and scientific and philosophical

methodology The Socratic Method Rebecca Bensen Cain,2007 Cain explains how Plato s Socrates uses fallacy irony ambiguity and other rhetorical strategies to advance the Greek maxim to know thyself as a means of caring for the soul thus offering a psychological model of dialectical arguments **The Socratic Method** Rebecca Bensen Cain,2007-02-26 This book develops a new account of Socratic method based on a psychological model of Plato s dramatic depiction of Socrates character and conduct Socratic method is seen as a blend of three types of philosophical discourse refutation truth seeking and persuasion Cain focuses on the persuasive features of the method since in her view it is this aspect of Socrates method that best explains the content and the value of the dialectical arguments Emphasizing the persuasive aspect of Socratic method helps us uncover the operative standards of dialectical argumentation in fifth century Athens Cain considers both the sophistic style of rhetoric and contentious debate in Socrates time and Aristotle s perspective on the techniques of argument and their purposes An informal pragmatic analysis of argumentation appropriate to the dialectical context is developed We see that Socrates uses ambiguity and other strategic fallacies with purposeful play and for moral ends Taking specific examples of refutations from Plato s dialogues Cain links the interlocutors characters and situations with the dialectical argument that Socrates constructs to refute them The merit of this interpretation is that it gives broad range depth and balance to Socrates argumentative style it also maintains a keen sensitivity to the interlocutors emotional reactions moral values and attitudes The book concludes with a discussion of the overall value purpose and success of Socratic method and draws upon a Platonic Socratic conception of the soul and a dialectical type of self knowledge *Logical Matters: Essays in Ancient Philosophy II* Jonathan Barnes,2012-12-13 The second volume of Jonathan Barnes papers on ancient philosophy contains twenty seven pieces under the broad heading of Logic The essays were written over a period of some forty years Some of them were published in obscure places and two or three of them in a foreign language The French essays have been done into English and all the essays have been retouched and a few of them substantially revised The first three essays in the volume are of a general nature being concerned with ancient views on the status of logic and with the distinction between formal and material inferences The next nine items deal with different aspects of Aristotelian logic the copula negation the categories homonymy and the principle of contradiction Then come three papers about the connection or lack of connection between Aristotelian logic and Stoic logic Two of the pieces discuss Theophrastus theory of hypothetical syllogisms After that things run more or less chronologically a short notice on the Dialecticians three essays on aspects of Stoic logic a pair of papers on ancient theories of meaning items on adverbs and connectors on Philoponus and Boethius and on an anonymous tract written in the autumn of 1007 AD All in all there is matter to divert scholars and students of ancient philosophy pt. II. Ethics. pt. III. Metaphysics. pt. IV. Theodicy Paul Janet,Gabriel Séailles-Ranson,1902 Cambridge University Extension Richard Green Moulton,1880 **Knowledge, Teaching and Wisdom** Keith Lehrer,B.J. Lum,Beverly A. Slichta,N.D. Smith,2013-04-17 This book derives from a 1993 National Endowment for the Humanities Summer Institute on Knowledge

Teaching and Wisdom The Institute took place at the University of California Berkeley and was co directed by Keith Lehrer and Nicholas D Smith The aims of the Institute were several we sought to reintroduce wisdom as a topic of discussion among contemporary philosophers to undertake an historical investigation of how and when and why it was that wisdom faded from philosophical view and to ask how contemporary epistemological theories might apply to the obviously related subjects of teaching and wisdom In recruiting participants Lehrer and Smith put the greatest emphasis on those with professional interests in epistemology and the history of philosophy of the ancient Greeks especially ancient Greek philosophy because in the writings all three subjects of the Institute were explicitly related and discussed But in addition to these two groups some effort was made also to include others with academic specializations in a variety of fields other than epistemology and the history of philosophy to ensure that a broad perspective could be achieved in our discussions To an obvious extent the papers in this book reflect the recruitment emphases and variety They also testify to the extent that the Institute managed to bring life to our subjects and to raise very old questions in a contemporary context *Theological encyclopædia and methodology*

Karl Rudolf Hagenbach, John Fletcher Hurst, 1884 **The Theory of Human Progression and Natural Probability of a Reign of Justice** Patrick Edward Dove, 1895 **A History of Science** Mary Cruse, 2021-08-01 Every great advance in science has issued from a new audacity of imagination John Dewey In A History of Science Mary Cruse takes readers on a fascinating journey through the evolution of this discipline in its many strands Throughout the centuries our conception of what constitutes science has developed hugely from ancient natural philosophers and medieval alchemists to Renaissance scholars and Enlightenment reformers Modern science evokes images of bubbling test tubes and spotless lab coats but this limited perception inhibits us in truly understanding the progress of science throughout history Cruse does not fall into this trap Learn about the development of agricultural tools the study of weather patterns mapmaking mathematics and modern geology Delve into the cutting edge science of the 21st century genetic engineering artificial intelligence sustainable energy projects Cruse even speculates on which breakthroughs are yet to come *Aëtiana* Jaap Mansfeld, Douwe (David)

Runia, 2009-10-23 Ancient doxography particularly as distilled in the work on problems of physics by Aëtiana is a vital source for our knowledge of early Greek philosophy up to the first century BCE But its purpose and method and also its wider intellectual context are by no means easy to understand The present volume contains 19 essays written between 1989 and 2009 in which the authors grapple with various aspects of the doxographical tradition and its main representatives The essays examine the origins of the doxographical method in the work of Aristotle and Theophrastus and also provide valuable insights into the works of other authors such as Epicurus Chrysippus Lucretius Cicero Philo of Alexandria and Seneca The collection can be read as a companion collection to the two earlier volumes of Aëtiana published by the two authors in this series 1997 2009 **Proceedings of the Boston Area Colloquium in Ancient Philosophy** John J. Cleary, Gary M.

Does Socrates Have a Method? Gary Alan Scott, 2009-03-02 Although the Socratic method is commonly understood as a style of pedagogy involving cross questioning between teacher and student there has long been debate among scholars of ancient philosophy about how this method as attributed to Socrates should be defined or indeed whether Socrates can be said to have used any single uniform method at all distinctive to his way of philosophizing This volume brings together essays by classicists and philosophers examining this controversy anew The point of departure for many of those engaged in the debate has been the identification of Socratic method with the elenchus as a technique of logical argumentation aimed at refuting an interlocutor which Gregory Vlastos highlighted in an influential article in 1983 The essays in this volume look again at many of the issues to which Vlastos drew attention but also seek to broaden the discussion well beyond the limits of his formulation Some contributors question the suitability of the elenchus as a general description of how Socrates engages his interlocutors others trace the historical origins of the kinds of argumentation Socrates employs others explore methods in addition to the elenchus that Socrates uses several propose new ways of thinking about Socratic practices Eight essays focus on specific dialogues each examining why Plato has Socrates use the particular methods he does in the context defined by the dialogue Overall representing a wide range of approaches in Platonic scholarship the volume aims to enliven and reorient the debate over Socratic method so as to set a new agenda for future research Contributors are Hayden W Ausland Hugh H Benson Thomas C Brickhouse Michelle Carpenter John M Carvalho Lloyd P Gerson Francisco J Gonzalez James H Leshner Mark McPherran Ronald M Polansky Gerald A Press Francois Renaud and W Thomas Schmid Nicholas D Smith P Christopher Smith Harold Tarrant Joanne B Waugh and Charles M Young
