## Markets And Merchants:

**Markets and Merchants of the Late Seventeenth Century** Charles Maresco, Jacob David, 1987 These 480 letters that passed between the successive heads of a major London trading house and its often prestigious European clientele and suppliers paint an intriguing picture of the changing conditions of local and international markets in 17th century Europe. The volume is enhanced by an extensive introduction that analyzes the context and course of the Maresco David business in each of its major markets and tabulations of valuable evidence on European shipping insurance and prices illuminating a vitally important epoch in the evolution of European trade

Merchants and Luxury Markets Carolyn Sargentson, 1996 Through a detailed examination of inventories and other previously unpublished records Carolyn Sargentson offers a new perspective on the history of consumption and she paints a fascinating picture of the luxury market during the decades that preceded the French Revolution. Her text raises important questions about the life cycle of objects and the way that they were valued the trading options of merchants who operated within narrow margins of credit and cashflow and the relationship between the different groups who were jostling for position and advantage in a competitive environment. The chapters cover the range of the merciers operations and are based on detailed case studies of families or aspects of trade in specialist markets. Subjects covered include the corporation of the merciers and their business practice their role in design imported goods and European imitations novelty and innovation the merciers shops and the magasins anglais

**The Silk Road Revisited** Julie Hill, 2006-12-18 In Revisiting the Silk Road experienced author and traveller Julie Hill takes us on a spellbinding journey into the heart of a little known but

volatile region stretching from Western China to the shores of the oil rich Caspian Sea and beyond to the Black Sea Hers is not only a series of journeys overland or a march through ancient history but an informed and contemporary view of life in both the liveliest cities and the farthest flung outposts of what once was the worlds stoutest and longest economic artery Julie Hills journey focuses on bazaars as a recurrent motifbazaars being the economic social and cultural centers of the Silk Roadand radiates from these bazaars to the life around them Because she speaks their languageliterally and culturallyJulie is often welcomed by her hosts not as a customer or a trader but as a confessor and a friend and she vindicates their trust by bringing their stories to life In Iran the author hears the predicament of women crying for freedom frustrated by the deteriorating economy and the conservatives stranglehold on power While inescapably exotic in its subjects and imagery the book is also a penetrating report on the effects of the recent geopolitical upheavals that have coursed through the regionseen not from the distance of spy satellites or high government places but on the ground often literally on the street or in the homes of ordinary folk The realities of todays Silk Road are far more complex than often understood and this book provides an absorbing and authoritative guide to any reader in search of both a magical adventure and a hard nosed investigation into one of the worlds most important and dynamic regions

Market definition and market power in the platform economy Jens-Uwe Franck, Martin Peitz, 2019-05-08 With the rise of digital platforms and the natural tendency of markets involving platforms to become concentrated competition authorities and courts are more frequently in a position to investigate and decide merger and abuse cases that involve platforms This report provides guidance on how to define markets and on how to assess market power when dealing with two sided platforms

**DEFINITION** Competition authorities and courts are well advised to uniformly use a multi markets approach when defining markets in the context of two sided platforms The multi markets approach is the more flexible instrument compared to the competing single market approach that defines a single market for both sides of a platform as the former naturally accounts for different substitution possibilities by the user groups on the two sides of the platform While one might think of conditions under which a single market approach could be feasible the necessary conditions are so severe that it would only be applicable under rare circumstances To fully appreciate business activities in platform markets from a competition law point of view and to do justice to competition law's purpose which is to protect consumer welfare the legal concept of a market should not be interpreted as requiring a price to be paid by one party to the other It is not sufficient to consider the activities on the unpaid side of the platform only indirectly by way of including them in the competition law analysis of the paid side of the platform Such an approach would exclude certain activities and ensuing positive or negative effects on consumer welfare altogether from the radar of competition law Instead competition practice should recognize straightforwardly that there can be markets for products offered free of charge i e without monetary consideration by those who receive the product

**ASSESSMENT** The application of competition law often requires an assessment of market power Using market shares as indicators of market power in addition to all the difficulties in standard markets raises further issues for two sided platforms When calculating revenue shares the only reasonable option is to use the sum of revenues on all sides of the platform Then such shares should not be interpreted as market shares as they are aggregated over two interdependent markets Large revenue shares appear to be a meaningful indicator of market power if all undertakings under consideration serve the same sides However they are often not meaningful if undertakings active in

the relevant markets follow different business models Given potentially strong cross group external effects market shares are less apt in the context of two sided platforms to indicate market power or the lack of it Barriers to entry are at the core of persistent market power and thus the entrenchment of incumbent platforms They deserve careful examination by competition authorities Barriers to entry may arise due to users coordination failure in the presence of network effect On two sided platforms users on both sides of the market have to coordinate their expectations Barriers to entry are more likely to be present if an industry does not attract new users and if it does not undergo major technological change Switching costs and network effects may go hand in hand consumer switching costs sometimes depend on the number of platform users and in this case barriers to entry from consumer switching costs increase with platform size Since market power is related to barriers to entry the absence of entry attempts may be seen as an indication of market power However entry threats may arise from firms offering quite different services as long as they provide a new home for users attention and needs

*Peasants, Merchants, and Markets* James Masschaele,1997 Peasants Merchants and Markets deals with the development of regional networks of trade and social interaction in the two centuries before the Black Death a period which saw dynamic changes in relations between towns and their rural hinterlands By examining the economic interests of urban merchants and peasant traders the commodities they exchanged and the markets and transportation networks they used to engage in trade the book explores how commerce helped to erode the localism of medieval society and to create enduring institutions and motivations for a more expansive social and economic life The book offers original interpretations and original use of historical source material and will be of interest to scholars and students of medieval and English history as well as historians dealing with commercial development in other periods and places Why Did We Choose to Industrialize?
