Pratt Ph.D., M. Kyle Matsuba Ph.D., 2018-05-30 The Life Story Domains of Identity and

Personality Development in Emerging Adulthood focuses on individuals formulations of the unique episodes and events of their lives that give one meaning and a sense of personal identity. This book brings the growing research on narrative study and the life story into focus by drawing from the existing research on personality development during emerging adulthood. In this book authors Michael W. Pratt and M. Kyle Matsuba present a series of chapters exploring how one's life story manifests across the many components of their developing identity including their religion, morality, vocation, society and the relationships they have with their parents, peers and romantic partners. Taking their cue from Erik Erikson's model of adolescent and adult development, the authors show readers exactly how a life story approach can illuminate the distinctive features of an individual's personality and development during this formative phase of life. Organized around a set of life contexts where personality is manifested i.e. adjustment, personal ideology, close relationships, occupation and civic life, this book draws on the authors' own longitudinal research on the development of the life story in emerging adulthood. Throughout the book they incorporate fascinating case studies and historical examples e.g. Darwin, Pope Francis, Martin Luther King Jr, Jane Fonda of individuals' unique development during this period of life in order to better illustrate the application of this approach to understanding the whole person in context.

International bibliography of research in marriage and the family

Joan Aldous, 1967 **Interpreting Life** Patricia C. Burke, 2011-03-25 *Interpreting Life* depicts one Christian woman's struggle to determine her place in the home and church as the traditional roles of the 1950s gave way to the chaos created by the social movements of the 1960s and 1970s. Burke's lengthy journey brought her from a state of confusion to a conscious awareness of the effects of her cohort's conservative religious beliefs and close relationships on her personal and spiritual development. From childhood she worshipped with a church where submission scriptures in the New Testament were taken literally and women were not allowed to participate in any public leadership roles such as leading prayers and songs teaching adults or preaching. As society changed and women gradually acquired leadership roles in other organizations these church practices became more stifling preventing many conservative women from using their God-given talents. Because of her marriage to a minister where she felt her family was living in a glass house it became exceedingly frustrating to adhere to traditional religious values. Throughout this process their marriage relationship was repeatedly challenged but their commitment to each other and the church helped them resolve their differences and work together to reinterpret women's roles in the church. Journal writing was the technique used to make sense of the contradictions and internal conflict experienced as this Christian woman attempted to remain faithful to her religious beliefs and yet develop to her full potential. Excerpts from over thirty years of writing reveal the strategies Burke employed to remain positive and productive as family and church priorities took precedent over her own dreams.

Cancian, 1990-08-31 In the last twenty five years Americans have gained considerable freedom in their personal lives Relationships are now more flexible and self development has become a primary goal for both men and women Most scholars have criticized this trend to greater freedom arguing that it undermines family bonds and promotes selfishness and extreme independence Francesca Cancian is more optimistic In this book she shows that many American couples succeed in combining self development with commitment and that interdependence not independence is their ideal In interdependent relationships love and self development do not conflict but reinforce each other Love in America compares traditional forms of marriage with these newer forms of close relationships Starting with the nineteenth century Cancian shows how gender roles became polarized with love which was identified with emotional expression no practical help being the responsibility of women while self development was regarded as a masculine concern These traditional images of love and relationships are still held by many Americans today even though as Cancian points out this can lead to marital conflict and individual stress and illness By contrast new images of love emphasizing self development for men and women and flexible androgynous roles began to emerge around 1900 accelerating in the 1960s She concludes that this trend to self development and androgyny will continue but that whether it will lead to more interdependent relationships or to more independence and isolation depends partly on economic and political changes in the wider society The evidence for Cancian's argument comes from sociological historical and psychological sources Her book will interest readers in these disciplines as well as appeal to a wide general audience
