## **Marswalk One:**

**Marswalk One** Shayler David, Andrew Salmon, Michael D. Shayler, 2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet. The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not. Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment. The book accepts that the journey will be made but does not specify precisely when. Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable. The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission objectives. This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo, Skylab, Salyut, Mir, Shuttle and ISS, Viking, Luna, Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor. In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate. When the decision is finally made to go to Mars it will be made in the knowledge that most of the world knows why we are going and what benefits mankind will see for the effort. The authors primary objective is to begin this understanding.

*Assembling and Supplying the ISS* David J. Shayler,2017-07-20 The creation and utilization of the International Space Station ISS is a milestone in space exploration But without the Space Shuttle it would have remained an impossible dream Assembling and Supplying the ISS is the story of how between 1998 and 2011 the Shuttle became the platform which enabled the construction and continued operation of the primary scientific research facility in Earth orbit Fulfilling an objective it had been designed to complete decades before 37 Shuttle missions carried the majority of the hardware needed to build the ISS and then acted as a ferry and supply train for early resident crews to the station Building upon the decades of development and experience described in the companion volume *Linking the Space Shuttle and Space Stations Early Docking Technologies from Concept to Implementation* this book explores a purpose built hardware processing facility challenging spacewalking objectives extensive robotic operations undocking a unmanned orbiter The experience and expertise gained through these missions allows space planners to improve space construction skills in advance of even more ambitious plans in the future

**The Last of NASA's Original Pilot Astronauts** David J. Shayler,Colin Burgess,2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA s exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF s highly classified

Manned Orbiting Laboratory MOL project seven military astronauts were also co opted into NASA s space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions

*Russia's Cosmonauts* Rex D. Hall,Shayler David,Bert Vis,2007-10-05 With the aid of unique photographs first hand interviews and historical resources Rex Hall Dave Shayler and Bert Vis explain for the very first time how Russian citizens have been selected and trained to fly in space and how these procedures have changed during the past 40 years The authors also describe the evolution of the often overlooked ground support infrastructure and how the role of cosmonauts has changed from the very earliest days of the Gagarin era through the demise of the Soviet Union to the era of international co operation and collaboration on programmes such as the International Space Station The book will provide much important background information and insight to the operational Soviet Russian manned space programme already covered in other Springer Praxis titles but revealing information and facts not covered elsewhere and providing a unique reference source for all those who wish to understand

the changing role of Russian cosmonauts in today s global space programme     [NASA's First Space Shuttle Astronaut Selection](#) David J. Shayler,Colin Burgess,2020-07-10 Unofficially they called themselves the TFNG or the Thirty Five New Guys Officially they were NASA s Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle Prior to this time only pilots or scientists trained as pilots had been assigned to fly on America s spacecraft but with the advent of the innovative winged spacecraft the door was finally opened to non pilots including women and minorities In all 15 of those selected were categorised as Pilot Astronauts while the other 20 would train under the new designation of Mission Specialist Altogether the Group 8 astronauts would be launched on a total of 103 space missions some flying only once while others flew into orbit as many as five times Sadly four of their number would perish in the Challenger tragedy in January 1986 In their latest collaborative effort the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews Throughout its remarkable 30 year history as the workhorse of NASA s human spaceflight exploration twice halted through tragedy the Shuttle fleet performed with magnificence So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America s Space Shuttle program This book on the Group 8 Astronauts the TFNGs is an excellent summation of the individuals first selected for the new Space Shuttle Program It provides insight into what it took to first get the Space Shuttle flying For any space enthusiast it is a must read Robert L Crippen PLT on STS 1 As a reader I had many moments where long lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page Loved it This is a must have book for every space enthusiast s library TFNG Mission Specialist Astronaut Richard Mike Mullane author of *Riding Rockets The Outrageous Tales of a Space Shuttle Astronaut* Many of the anecdotes in the book brought back memories of challenges opportunities and a team of men and women who were committed not just to the space program but to one another I ve gone back to it several times as a reference source TFNG Steve Hawley 5 time Space Shuttle Mission Specialist Astronaut The TFNG book is incredible and amazingly thorough The detail in the book is awesome It is my go to book for any of the details I ve forgotten TFNG Dr Rhea Seddon 3 time Space Shuttle Mission Specialist Astronaut I can t believe how detailed and complete it is FANTASTIC work TFNG Robert L Hoot Gibson 5 time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office     *Manned Spaceflight Log II—2006-2012* David J. Shayler,Michael D. Shayler,2013-04-05 Manned Spaceflight Log discusses over 40 recent spaceflights from September 2006 through September 2012 a time of great change in human spaceflight history Following on from *Praxis Manned Spaceflight Log 1961-2006* the authors continue the story until the end of September 2012 with new chapters detailing the development and accomplishments of human spaceflight expanded tables and additional photographs many in color throughout The book opens with a new foreword by Colonel Alfred M Worden USAF Retired NASA Astronaut and CMP of Apollo 15 which reflects on the changing history of human spaceflight

and the prospects for future operations The first chapter explains how human spaceflight has approached the different challenges of exploring space and provided the hardware to meet those challenges This chapter also describes the various attempts to reach orbital flight and the often confusing distinction between ballistic sub orbital and so called astro flights of the X 15 rocket research aircraft program Chapter 2 recalls key historic moments and missions across five decades of human spaceflight Each decade has provided useful lessons for the next and a foundation for future achievement The new mission entries are collected in the third section in chronological order A review of the next steps in human spaceflight including plans to occupy the International Space Station well into the 2020s and the growth of the Chinese manned space program including a large space station and planned base on the Moon is discussed in Chapter 4 The tables provide a complete up to date overview of human spaceflight operations and experience from April 1961 to September 2012 and a selected chronology of important milestones from those years Completing the book is a comprehensive bibliography that lists all the major Springer Praxis human spaceflight titles and other important works that provide the reader with a resource to continue further research

**Gemini 4** David J. Shayler,2018-12-18 The flight of Gemini 4 in June 1965 was conducted barely four years after the first Americans flew in space It was a bold step by NASA to accomplish the first American spacewalk and to extend the U S flight duration record to four days This would be double the experience gained from the six Mercury missions combined This daring mission was the first to be directed from the new Mission Control at the Manned Spacecraft Center near Houston Texas It also revealed that Working outside the spacecraft would require further study Developing the techniques to rendezvous with another object in space would not be as straightforward as NASA had hoped Living in a small spacecraft for several days was a challenging but necessary step in the quest for even longer flights Despite the risks the gamble that astronauts Jim McDivitt and Ed White undertook paid off Gemini 4 gave NASA the confidence to attempt an even longer flight the next time That next mission would simulate the planned eight day duration of an Apollo lunar voyage Its story is recounted in the next title in this series Gemini 5 Eight Days in Space or Bust
