Marx Versus Markets:

Marx Versus Markets Stanley Williams Moore, 1993 The challenge to Marxian theory presented by the current collapse of communist economies centers on the role of markets Marx versus Markets points out that Marx defines communist economies even in their lower stage of development as classless economies without markets It then examines his claims that classless economies with markets are in some sense inferior to communist economies Two conclusions emerge from Stanley Moore's analysis First Marx's major arguments for abolishing commodity exchange rely on moral and philosophical premises derived from Feuerbach in the earlier writings and from Hegel in the later Second Marx's ideal of communist economy is incompatible with his materialistic approach to history Marx's attack on markets flunked the test of theory one hundred years before it flunked the test of practice

Self-management and the Crisis of Socialism Michael Wayne Howard, 2000 While some conclude from the revolutions of 1989 that socialism is dead interest in socialism continues because of persisting problems of contemporary capitalism In this exciting text Michael W Howard offers critiques of liberal communitarian postmodern and some Marxist perspectives in order to develop a left liberal defense of a model of self managed market socialism that includes a basic income for all Specific applications of his view include analyses of its implications for the global marketplace the changing nature of workplaces and media restructuring and ownership This work is sure to be of interest to social scientists public policy makers and economists as well as to feminists ecologists and others concerned with how market socialism is relevant

to their social issues [Karl Marx's Life, Ideas, and Influences](#) Shaibal Gupta,Marcello Musto,Babak Amini,2019-09-28 Since the latest crisis of capitalism broke out in 2008 Marx has been back in fashion and sometimes it seems that his ideas have never been as topical or as commanding of respect and interest as they are today This edited collection arises from one of the largest international conferences dedicated to the bicentenary of Marx s birth The volume contains 16 chapters authored by globally renowned scholars and is divided into two parts I On the Critique of Politics II On the Critique of Political Economy These contributions from multiple academic disciplines offer diverse perspectives on why Marx is still so relevant for our times and make this book a source of great appeal for both expert scholars of Marx as well as students and general readers who are approaching his theories for the first time [Capitalism vs. Socialism](#) Brajesh Pilla,2025-01-03

[Clare Market Review](#) ,1906 [Market as a Weapon](#) Anton Oleinik,2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them Power can be used to solve problems related to social action by merging two or several centers of decision making into one The actor vested with power decides exactly how coordination and adjustment can be achieved This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses Market as a Weapon focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book Both qualitative

and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book *The Comintern and the Global South* Anne Garland Mahler,Paolo Capuzzo,2022-12-30 The Comintern and the Global South Global Designs Local Encounters studies the relations and productive tensions between the Third International intellectual histories of racial justice and anti imperialism as well as other forms of internationalism Building on extant institutional histories of the Third International it moves in new directions by focusing on the points of intersection often conflictual and short lived with anti imperialist anti racist and nationalist organizing making the Third International a site of encounter between a global political project and more local and regional contexts Due to the broad range of geographic and linguistic expertise of the contributors this book traces routes of exchange that are often elided in existing studies of the Third International The chapters address how actors from Global South contexts shaped key debates on for example the role of Black Indigenous and migrant labor the Islamic question and the peasant question which challenged Bolshevik epistemological frameworks All such questions involved political subjectivities that the Comintern tried to reductively frame within a global revolution driven by Moscow resulting in the Comintern's ultimate disintegration Nevertheless this juncture between the Comintern's global designs and its local encounters left a significant legacy that would later be reconfigured in mid century anticolonial movements
