Dopfer,1979-06-17 **Soviet Population Policy** Helen Desfosses,2013-10-22 Soviet Population Policy Conflicts and Constraints focuses on the study of population policy in the USSR The text looks at the problems identified with population including migration depopulation of rural areas and rapid urbanization The book starts by outlining the development of Soviet census considering its purposes and methods involved The text then proceeds by giving information on population dynamics in which the issue of population is seen as inseparable from political economic and social concerns One of the issues discussed is how military manpower can be affected by the problem on population Another feature of the book is the sector of aging citizens in which it is identified that the country has experienced an increase in the number of pensioners In this context a comparison of the retirement systems of the United States and Russia is presented The book also looks at the relationship of fertility and female work status in the country The text goes further by discussing the pro natalist policies of the country in which the reduction in the psychological and material costs of having children is noted A discussion on the four models used by demographers to emphasize the issues affecting the population is also presented The book notes that the country s position on population is rooted in Marxism Readers who are interested in establishing the relationship of population with other social concerns of a country can find this book worth considering Center Discussion Paper Yale University. change fertility mortality and finally migration These are followed by chapters on the impacts of age structures including the potential for a demographic dividend and of the more qualitative aspects of human resource development through formal education and ICTs with further chapters on population policies and population futures The book incorporates illustrative text boxes and case studies on regions in Africa the Middle East and Asia which elaborate the broader theoretical and conceptual substance of the ten major chapters Each chapter has Discussion Questions and Sources and Further Reading sections and there is an extensive integrated References section The arguments of the book bring together a large but fairly loosely integrated literature from population studies development studies and geography in a conceptually coordinated empirically wide ranging and challenging discussion It is targeted at an audience in undergraduate courses in Geography and in Masters courses in Development Studies and Population Studies The books succinct but erudite structure means it can be used either as a course text book or as a basic reference on a range of current issues and likely concerns at the interface between Geography Development Studies and Population Studies
