Message From Earth:

Speaking Beyond Earth Paul E. Quast, David Dunér, 2024-04-03 Since the dawn of the Space Age small cohorts of humanity have broadcast signals towards other stars fabricated space time capsules to speak for Earth aboard interstellar probes deposited collections of space oddities on other astronomical bodies and permanently incised the memory of our species across the deep time legacy of the Sol System Many of these purposeful messages are the consequence of age old behaviors traditions and material practices using modern aerospace technologies Most attempt to preserve narratives of human experience in social exchange devices for imagined exotic audiences Looking back upon this accumulative history of messaging from Earth how do we begin to interpret such an eclectic portrait of Earth for ourselves Surveying and cataloguing the variety of these artifacts through a series of interdisciplinary essays and visual documentation this volume chronicles our changing relationships customs and assumptions made within this material culture for our own eyes What do these autobiographical accounts tell us about Terrans and our minds set against the backdrop of our planetary history

The Great Message Albert Van der Naillen, 1925 [The Christian Advocate](#), 1924 **The Outer Edge** William N. Ellis III, 2010-11-09 We were created on the outer edge of the universe and powerful ancients continue to watch us from that home far away The ancients use 100% of their brains which enables them to perform fantastic feats no earthly creature could imagine Many years ago these ancient beings altered the human DNA removing our capability to use 100% of our brains therefore keeping us forever beneath their reign and keeping them forever safe from human attack Despite the lessened use of our brains the human race has developed high tech radar devices that travel into space searching for intelligent life The ancients have become aware of this technology they are now concerned that humans have advanced enough to bring war In an effort to avoid the inevitable the ancients are coming to Earth to destroy the human race Extermination is eminent until Earth connects with its sister planet Together the humans must fight back against this ancient power that seeks to destroy The Outer Edge is not merely science fiction it is an authoritative vision of our living universe These fictional tribulations have direct and irrefutable links to science And so the question remains is science fiction truly fiction at all or does it peer into the depths of fact and foreshadow devastation yet to come Decipher the true riddles of the universe with The Outer Edge These riddles include the science based posits on how the afterlife and prayer are indeed true We also answer how the psychics mediums and all the paranormal work through science ForeWord Clarion Review FICTION The Outer Edge Our Origins From Dust to Us William N Ellis III The Messenger Trafford Publishing 978 1 4269 4204 4 Three Stars out of Five Where do we come from is perhaps the most popular existential question Over the years there have been numerous possible answers the Big Bang divine creation over seven days adaption from single celled organisms Ultimately the answer to the question is not necessarily about where we came from but why we are here William N Ellis III's latest book The Outer Edge explores a theory that seeks to answer both Jampa and Pammy are siblings from the Outer Edge the perimeter of the

universe As young members of the Ancient Good they protect the unified grid from beings like Riverway a member of the Ancient Evil The outcome of the battle leads Ancient Good to journey to a blue planet called Earth There the story switches to Gene a common salesman living with his wife and family in Ohio After a near accident in his home Gene discovers he has an extraordinary gift and opportunity Under the guidance of Pammy and eventually Jampa Gene must defend Ancient Good against Ancient Evil in a great debate The Outer Edge is a modern quantum mysticism parable similar to works like What the BLEEP do we know It champions knowledge compassion and love as a way to work with and shape the universe Ellis claims to have used automatic writing in addition to having received ideas for the story as messages from the spirit realm that's why he's the messenger not the author The result is clear precise writing particularly when it comes to crafting tense powerful scenes After Jampa makes a speech Ellis writes The entire hall erupted in a frenzy of applause From left to right to top to bottom warriors slammed their palms together and parted their lips to cheer and whistle Briefly a tear trickled in Jampa's eye for the idea of living beings committed to lives of goodness never failed to move him Ellis commits a portion of the book to building up for a war but after a skirmish between two characters the author goes straight to negotiating the treaty The story does have very strong central characters For instance Riverway his antagonist is chilling and diabolical yet strangely sympathetic after you learn why he is like he is Although Ellis might rush his characters through plot points he gives them clever descriptive dialogue In one scene Pammy advises Gene saying Battling against evil is like trying to floss using barbed wire The Outer Edge is fascinating It's the perfect work for introducing others to the concepts in quantum mysticism Even if readers only comprehend The Outer Edge on a surface level it's an interesting tale of good versus evil with a sci fi bent While it might be slightly confusing to those unfamiliar with the ideas it's a thought provoking answer to anyone who wonders how humankind got here Katerie Prior *Shades of Earth* Beth Revis, 2013-11-14 The final book in the New York Times bestselling trilogy perfect for fans of Battlestar Galactica and Prometheus FUELED BY LIES RULED BY CHAOS ALMOST HOME Amy and Elder have finally left the oppressive walls of the spaceship Godspeed behind They're ready to start life afresh to build a home on Centauri Earth the planet that Amy has traveled 25 trillion miles across the universe to experience But this new Earth isn't the paradise Amy had been hoping for There are giant pterodactyl like birds purple flowers with mind numbing toxins and mysterious unexplained ruins that hold more secrets than their stone walls first let on The biggest secret of all Godspeed's former passengers aren't alone on this planet And if they're going to stay they'll have to fight Amy and Elder must race to discover who or what else is out there if they are to have any hope of saving their struggling colony and building a future together They will have to look inward to the very core of what makes them human on this their most harrowing journey yet Because if the colony collapses Then everything they have sacrificed friends family life on Earth will have been for nothing **Earth** Frank Townshend, 1929 "A Message to Earth" Esoteric Christian Union, 1892
