Meta Phenomenon:

The Meta Phenomenon Robert A. Samek, 1981

The Metaverse of Consciousness Shelli Renée Joye, 2025-05-20

Develops the concept of the metaverse the transcendental universe composed of additional hidden dimensions operating in parallel with space and time Integrates and maps the theories of consciousness developed by Carl Jung David Bohm Pierre Teilhard de Chardin and other scientists Offers the reader a path into the hidden dimensions through detailed maps of psyche mind and cosmos The metaverse as this wider universe is now coming to be known is rooted in one interconnected consciousness that encompasses space and time as well as previously unknown dimensions only recently detected In this book Shelli Ren e Joye Ph D offers ways in which to visualize enter and explore a multitude of these transcendent nonspatial and nontemporal states and stages of consciousness as she reveals vast webs of interlinked consciousness forming a single universal psyche Joye integrates the ideas of modern scientist philosophers who view reality as a projection of a single multidimensional consciousness Carl Jung and his concept of the psychoids Pierre Teilhard de Chardin and his vision of an integrated noosphere of consciousness and the quantum maps of consciousness developed by Karl Pribram and David Bohm The book culminates with a call to explore transcendental consciousness by developing and following our own uniquely personal paths with which we too can enter the wider dimensions of awareness in the metaverse

Non-Finiteness Bingjun Yang, 2022-04-28 As a gateway to central questions in linguistics non finiteness is unavoidable in both typological studies and aspects of natural language processing such as text segmentation and annotation This study presents a process relation framework to explain the more complex previously unaccounted for instances of non finiteness in clause structure

Metareference across Media: Theory and Case Studies , 2009-01-01 Strange as it may seem Cervantes s novel Don Quixote Marc Forster s film *Stranger than Fiction* Shakespeare s play *A Midsummer Night s Dream* Pere Borrell del Caso s painting *Escaping Criticism* reproduced on the cover of the present volume and Mozart s sextet *A Musical Joke* all share one common feature they include a meta dimension Metaization the movement from a first cognitive referential or communicative level to a higher one on which first level phenomena self reflexively become objects of reflection reference and communication in their own right is in fact a common feature not only of human thought and language but also of the arts and media in general However research into this issue has so far predominantly focussed on literature where a highly differentiated albeit strictly monomedial critical toolbox exists Metareference across Media remedies this onesidedness and closes the gap between literature and other media by providing a transmedial framework for analysing metaphenomena The essays transcend the current notion of metafiction pinpoint examples of metareference in hitherto neglected areas discuss the capacity for metaization of individual media or genres from a media comparative perspective and explore major historical forms and functions as well aspects of the development of metaization in cultural history Stemming from diverse disciplinary and methodological backgrounds the contributors propose new and refined concepts and models and cover a broad range of

media including fiction drama poetry comics photography film computer games classical as well as popular music painting and architecture This collection of essays which also contains a detailed theoretical introduction will be relevant to students and scholars from a wide variety of fields intermediality studies semiotics literary theory and criticism musicology art history and film studies

Agency and Consciousness in Discourse Paul Thibault, 2004-12-01 In the past two decades there has been considerable interest in the ways in which subjects are positioned in discursive practice This interest has entailed a focus on the role of language and discourse in the processes in and through which subjects are constituted in discourse However questions of agency and how it relates to consciousness have received less attention This book explores the ways in which agency and consciousness are created through transactions between self and other The book argues that it is necessary to regard body brain interactions in the context of the social and discursive practices which act upon human bodies These issues of agency and individuation are explored in relation to infant semiosis as well as in relation to children s symbolic play Thibault looks at the importance of the self referential moral conscience in relation to the interpersonal dimension of all acts of meaning making This conscience is also connected to the development of a self referential viewpoint which the book argues is connected to the ecosocial semiotic systems of thinking about consciousness as a complex system operating on many different levels The author discusses and evaluates the work of linguists psychologists biologists semioticians and sociologists such as Basil Bernstein Mikhail Bakhtin J J Gibson M A K Halliday Walter Kauffman Lakoff Johnson Jay Lemke Jean Piaget and Stanley Salthe to develop a new theory of agency and consciousness

JMCC: Volume I - Consciousness J.L. Harter, 2015-08-24 This is a publication of the online Journal of Metaphysics and Connected Consciousness This is the Journal s first publication Volume I Consciousness

Systemic Functional Grammar J.R. Martin, Beatriz Quiroz, Pin Wang, 2023-06-08 Systemic Functional Linguistics SFL is a usage based theory of language founded on the assumption that language is shaped entirely by its various functions in the contexts in which it used The first of its kind this book advances SFL by applying it comparatively to English Spanish and Chinese By analysing English alongside two other typologically very different major world languages it shows how SFL can effectively address two central issues in linguistics namely typology and universals It concentrates in particular on argumentation carefully explaining how descriptions of nominal group verbal group and clause systems and structures are motivated and draws on examples from key texts which display a full range of ideational interpersonal and textual grammar resources By working across three world languages from a text based perspective and demonstrating how grammar descriptions can be developed and improved the book establishes the foundations for a groundbreaking functional approach to language typology
