Handicrafts and do it yourself projects have always been a library's most popular and heavily requested subject. And for more than a decade a definitive index to handicraft books has not been published. To fill this gap the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the Index to Handicraft Books listing more than 900 books and over 12,400 subject entries covering books published from 1974 to 1984. The Index to Handicraft Books is an essential reference tool for librarians who want to help someone find instructions for a varied range of do it yourself projects providing quick access to craft projects in books more recent than previous handicraft index books have listed. Each entry in the index consists of a subject heading the name of the project as listed in the book the author and title of the book and the page numbers on which the project can be found. The author and title correspond to those in the List of Works Cited section which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through inter library loan. Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974 the list concentrates mainly on medium priced books that most libraries buy.    [Metalworking through History](#) Ana M. Lopez, 2009-04-30 Metalworking Through History provides a comprehensive historic overview of the subject of metalworking while exploring it within its cultural context. It is written from the perspective that the crafting of objects in metal is a unique way of understanding a particular time and culture. As a broad encyclopedia of metalworking it allows the reader to view the different societies and periods that produced work in this medium as part of a global interrelated practice. Comprised of over sixty entries on relevant time periods cultures makers and processes the book is a much needed general reference text in the survey of this craft. The subjects span all the major metalworking periods and peoples from the rituals of African iron smelting to the twentieth century studio movement. Outstanding individual makers are highlighted to give additional insight into the times at which they were active. Furthermore the materials and techniques used in the act of metalworking are clearly explained in terms that are easily understood by a practitioner with tacit knowledge of the medium. Suggested further readings and cross references allow for the expansion of research and additional study. It is an excellent first resource for understanding the concepts and terminology of the ancient and pervasive craft of metalworking. Volume includes eight pages of color plates and black and white photos throughout. Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11  
The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa **Catalog of Copyright Entries, Third Series** Library of Congress.
