Metaphysics, Its Structure and Function Stephan Körner,1984 Metaphysics Stephan Körner,1984 **Dictionary of Twentieth-Century British Philosophers** Stuart Brown,2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture *The Relations of Structural and Functional Psychology to Philosophy* James Rowland Angell,1903 The System of the Sciences According to Objects and Methods Paul Tillich,1981 **The Continuum Encyclopedia of British Philosophy: K-Q** A. C. Grayling,Andrew Pyle,Naomi Goulder,2006 *The Decennial Publications of the University of Chicago* University of Chicago,1903 *Understanding Hermeneutics* Lawrence Kennedy Schmidt,2016-04-15 This series provides short accessible and lively introduction to the major schools movements and traditions in philosophy and the history of ideas since the beginning of the Enlightenment All books in the series are written for undergraduates meeting the subject for the first time Hermeneutics concerns itself with the theory of understanding and the interpretation of language The question of how to correctly interpret and understand others remains one of the most contested branches of philosophy In Understanding Hermeneutics Lawrence Schmidt provides an introduction to modern hermeneutics through a systematic examination of the ideas of its key philosophical proponents Chapter 1 examines the ideas of the Protestant theologian Friedrich Schleiermacher who argues that misunderstanding is always possible so we must always employ interpretation if we are to understand correctly Chapter 2 discusses the ideas of Dilthey who maintains that understanding in the humanities is fundamentally different from explanation in the natural sciences and who presents a methodology to judge what another person means or feels by means of their language and also their gestures facial expressions and manners of acting Chapter 3 explores the ideas of Heidegger who radicalizes the concept by shifting its focus from interpreting texts to an existential interpretation of

human being In Chapter 4 the recent ideas of Gadamer are examined which extend to examining the structures of hermeneutic experience and to question the supremacy of the natural sciences as models for truth The final chapters consider some of the criticisms and controversies surrounding hermeneutics including the work of Habermas Hirsch Ricoeur and Derrida and the prospects for the future of hermeneutics *Journal of the American Medical Association*, 1906 Includes proceedings of the association papers read at the annual sessions and lists of current medical literature *Scientific Realism and the Quantum* Steven French,Juha Saatsi,2020-02-13 Quantum theory is widely regarded as one of the most successful theories in the history of science It explains a hugely diverse array of phenomena and is a natural candidate for our best representation of the world at the level of fundamental physics But how can the world be the way quantum theory says it is It is famously unclear what the world is like according to quantum physics which presents a serious problem for the scientific realist who is committed to regarding our best theories as more or less true The present volume canvasses a variety of responses to this problem from restricting or revising realism in different ways to exploring entirely new directions in the lively debate surrounding realist interpretations of quantum physics Some urge us to focus on new formulations of the theory itself while others examine the status of scientific realism in the further context of quantum field theory Each chapter is written by a renowned specialist in the field and is aimed at graduate students and researchers in both physics and the philosophy of science Together they offer a range of illuminating new perspectives on this fundamental debate and exemplify the fruitful interaction between physics and philosophy *Philosophy and Psychology Pamphlets*, 1903 *The Synopticon*, 1990 Major philosophical concepts outlines with reading lists referring to quotations in vols of the series Great books of the Western world **The Decennial Publications** University of Chicago,1903 **Encyclopædia of Religion and Ethics:** **Arthur-Bunyan** James Hastings,John Alexander Selbie,Louis Herbert Gray,1910 Scope theology philosophy ethics of various religions and ethical systems and relevant portions of anthropology mythology folklore biology psychology economics and sociology **The Philosophical Review** Jacob Gould Schurman,James Edwin Creighton,Frank Thilly,Gustavus Watts Cunningham,1903 An international journal of general philosophy **Practical Sociology in the Service of Social Ethics** Charles Richmond Henderson,1903 **The Journal of Mental Science**, 1873 *Medical Sentinel*, 1918 *Investigations Representing the Departments* University of Chicago,1903 *Anthropologia, in which are included the proceedings of the London anthropological society [ed. by R.S.
