Method In Ethical Theory:

The Methods of Ethics Henry Sidgwick, 1838-1900 This Hackett edition first published in 1981 is an unabridged and unaltered republication of the seventh 1907 edition as published by Macmillan and Company Limited From the forward by John Rawls In the utilitarian tradition Henry Sidgwick 1838 1900 has an important place His fundamental work *The Methods of Ethics* first edition 1874 seventh and last edition 1907 here reprinted is the clearest and most accessible formulation of what we may call the classical utilitarian doctrine This classical doctrine holds that the ultimate moral end of social and individual action is the greatest net sum of the happiness of all sentient beings Happiness is specified as positive or negative by the net balance of pleasure over pain or as Sidgwick preferred to say as the net balance of agreeable over disagreeable consciousness

Method in Ethical Theory Abraham Edel, 1893-1993-09-01 When *Method in Ethical Theory* was initially published in 1963 it called for greater awareness of how an agenda for moral philosophy is established and the conditions under which it changes Edel strives for effective comparison of ethical theories denying that any one theory has exclusive claim to the truth about ethics He maintains that different theories are appropriate for particular conditions In *Method in Ethical Theory* he works out an approach for ethical theory that is both critical and comprehensive Edel presents four approaches to his study the analytical deals with terms and concepts the descriptive seeks to accurately depict classify and interpret moral qualities and situations the causal explanatory raises questions about functional relations and the evaluative critically observes and applies standards Alongside of these perspectives Edel sets up a comparative approach one that grounds the study of ethics in empirical and historical research In his new introduction Edel describes the historical context in which his book was written and explains his reasons for writing it thirty years ago *Method in Ethical Theory* continues to be a fundamental contribution to ethical studies It will be of interest to philosophers sociologists and specialists in the study of ethics

Methodology and Moral Philosophy Jussi Suikkanen, Antti Kauppinen, 2018-10-31 Many ethicists either accept the reflective equilibrium method or think that anything goes in ethical theorizing as long as the results are plausible The aim of this book is to advance methodological thinking in ethics beyond these common attitudes and to raise new methodological questions about how moral philosophy should be done What are we entitled to assume as the starting point of our ethical inquiry What is the role of empirical sciences in ethics Is there just one general method for doing moral philosophy or should different questions in moral philosophy be answered in different ways Are there argumentative structures and strategies that we should be encouraged to use or typical argumentative patterns that we should avoid This volume brings together leading moral philosophers to consider these questions The chapters investigate the prospects of empirical ethics outline new methods of ethics evaluate recent methodological advances and explore whether different areas of moral philosophy are methodologically continuous or independent of one another The aim of *Methodology and Moral Philosophy* is to make moral philosophers more self aware and reflective of the way in which they do moral philosophy and also to encourage them to take part in methodological debates
