Understanding Language Teaching B. Kumaravadivelu, 2006 Drawing from seminal foundational texts and from critical commentaries made by various scholars the author examines the profession's transition from method to postmethod and in the process elucidates the relationship between theory research and practice. This book is intended for teacher educators practicing teachers and graduate students. **Understanding Language Teaching** B. Kumaravadivelu, 2006-04-21 This book traces the historical development of major language teaching methods in terms of theoretical principles and classroom procedures and provides a critical evaluation of each. Drawing from seminal foundational texts and from critical commentaries made by various scholars Kumaravadivelu examines the profession's current transition from method to postmethod and in the process elucidates the relationship between theory research and practice. The chief objective is to help readers see the pattern that connects language learning teaching methods and postmethod perspectives. In this book Kumaravadivelu brings together a critical vision of L2 learning and teaching a vision founded at once on historical development and contemporary thought connects findings of up to date research in L2 learning with issues in L2 teaching thus making the reader aware of the relationship between theory research and practice presents language teaching methods within a coherent framework of language learner and learning centered pedagogies thus helping the reader to see how they are related to each other shows how the three categories of methods evolved historically leading ultimately and inevitably to the emergence of a postmethod condition and provides the reader with a solid background in several interconnected areas of L2 pedagogy such as concepts of competence input factors intake processes interactional modifications and instructional design.

Understanding Language Teaching From Method to Postmethod is intended for an international audience of teacher educators practicing teachers and graduate students researchers curriculum planners and materials designers in the field of second and foreign language teaching. **Approaches and Methods in Language Teaching** Jack C. The Grammar-Translation Method Rene Tetzner,2006-04-09 Essay from the year 2004 in the subject American Studies Linguistics grade 13 out of 16 University of Bedfordshire Luton Business School 11 entries in the bibliography language English abstract The grammar translation method GTM to teach foreign languages dominated from the mid nineteenth century to the beginning of World War Two and it is still used in some countries today In the late eighteenth century Prussia in Germany was the first place which began to establish GTM as the main method to teach a second language L2 at national high schools known as Gymnasiums As Howatt 1997 p 131 stated the method took an almost impregnable position as the favoured methodology of the Prussian Gymnasien after their expansion in the early years of the nineteenth century Indeed GTM was in the mid nineteenth century the only widely used teaching method in the schools not only in Germany also in other European countries Originally it was used to teach Greek and Latin Five hundred years ago Latin was

the official or main language of education religion business and authorities in Europe After political changes in Europe Latin changed gradually a process of more than three hundred years from a living language to a school curriculum language and was replaced by English German French or Italian as the main language for communication purposes Richards and Rodgers 1997 In the mid nineteenth century Latin remained as an important subject in education for the upper class For centuries Latin was taught to understand the fundamentals of grammar and translation in order to read or interpret Latin texts Most of the students who were taught Latin were very well educated and therefore it was easier for them to learn a different language It was thought that the same teaching method to teach Latin could be used to teach other foreign languages such as German French or English The same method to teach very well educated people should suit to teach younger learners as well In the mid nineteenth century the main aim was to learn a L2 for the purpose of gaining access to its literature in order to develop the learner s minds mentally Due to this historical background GTM is also known as the traditional or classical method as the grammar school method or in America as the Prussian method Along with industrialisation more opportunities for communication had been arising especially in Europe and consequently new methods for language teaching were developed in order to meet the needs of the new class of language learners Howatt 1997 *A Selected and Annotated Bibliography on Professional Literature in Education* California High School Teachers' Association.
