

A person is floating on their back in a pool at night. They are wearing a dark one-piece swimsuit. Their arms are spread out to the sides, and their legs are slightly bent. The water is dark, and the scene is lit with a strong blue light, creating a serene and relaxing atmosphere. The person's face is partially visible, showing a peaceful expression.

Hopkins, Harry Fagan Yancey, Thomas
Fraser**

Overnight Float:

Challenging Operations Katherine C. Kellogg, 2011-07-30 In 2003 in the face of errors and accidents caused by medical and surgical trainees the American Council of Graduate Medical Education mandated a reduction in resident work hours to eighty per week Over the course of two and a half years spent observing residents and staff surgeons trying to implement this new regulation Katherine C Kellogg discovered that resistance to it was both strong and successful in fact two of the three hospitals she studied failed to make the change *Challenging Operations* takes up the apparent paradox of medical professionals resisting reforms designed to help them and their patients Through vivid anecdotes interviews and incisive observation and analysis Kellogg shows the complex ways that institutional reforms spark resistance when they challenge long standing beliefs roles and systems of authority At a time when numerous policies have been enacted to address the nation s soaring medical costs uneven access to care and shortage of primary care physicians *Challenging Operations* sheds new light on the difficulty of implementing reforms and offers concrete recommendations for effectively meeting that challenge

Wyoming Don Pitcher, 2006-06-02 Each guide contains not only detailed information on the best transportation accommodation restaurant and sightseeing options but also custom maps and fascinating sidebars all the tools travelers need to make their own choices and create a travel strategy that is theirs alone

Resident Duty Hours Institute of Medicine, Committee on Optimizing Graduate Medical Trainee (Resident) Hours and Work Schedules to Improve Patient Safety, 2009-04-27 Medical residents in hospitals are often required to be on duty for long hours In 2003 the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours in order to protect patients and residents from unsafe conditions resulting from excessive fatigue *Resident Duty Hours* provides a timely examination of how those requirements were implemented and their impact on safety education and the training institutions An in depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue related errors In addition to recommending opportunities for on duty sleep during long duty periods and breaks for sleep of appropriate lengths between work periods the committee also recommends enhancements of supervision appropriate workload and changes in the work environment to improve conditions for safety and learning All residents medical educators those involved with academic training institutions specialty societies professional groups and consumer patient safety organizations will find this book useful to advocate for an improved culture of safety
