PA4 Locomotive Norman E. Anderson, Chris G. MacDermot, 1978      *Locomotive Testing Plant at Altoona, Pa* Pennsylvania Railroad. Test Department, 1913      From Steam to Diesel Albert J. Churella, 1998-08-03 This overview of the leading locomotive producers in the United States during the twentieth century shows how they responded to a radical technological change the replacement of steam locomotives by diesels The locomotive industry provides a valuable case study of business practices and dramatic shifts in innovation patterns since two companies General Motors and General Electric that had no traditional ties to locomotive production demolished established steam locomotive manufacturers Albert Churella uses many previously untapped sources to illustrate how producers responded to technological change particularly between the 1920s and the 1960s Companies discussed include the American Locomotive Company ALCo the Baldwin Locomotive Works the Lima Locomotive Works Fairbanks Morse the Electro Motive Division of General Motors and General Electric A comparative work of business history and the history of technology the book is not a complete history of any locomotive builder nor does it explore the origins of the diesel engine in great detail What it does and does superbly is to demonstrate how managers addressed radical shifts in technology and production methods Churella reveals that managerial culture and corporate organizational routines more than technological competency per se allowed some companies to succeed yet constrained the actions of others He details the shift from small batch custom manufacturing techniques in the steam locomotive industry to mass production methods in the diesel locomotive industry He also explains that chance events and fortuitous technological linkages helped to shape competitive patterns in the locomotive industry      *Locomotive Testing Plant at Altoona, Penna* , 1910      **American Diesel Locomotives** Brian Solomon, Introduced in the 1930s efficient and adaptable diesel locomotives had all but displaced steam locomotives by 1960 This colorful photographic history examines the development implementation and operation of diesel locomotives from the gleaming pioneer Zephyrs of the 30s through today s 8000 horsepower beasts In the course of examining the dawn and preeminence of diesel power the author offers a glimpse of America s major railways both freight and passenger in stunning modern and period color photography Manufacturers like EMD Alco and GE are included The final chapter describes the operation and maintenance of modern diesel locomotives and an appendix lists where rail fans can see restored examples of early diesels today      **Railfan & Railroad** , 1996      **Report of Proceedings of the ... Annual Convention of the American Railway Master Mechanics' Association** American Railway Master Mechanics' Association, 1913      Bulletin Pennsylvania Railroad, 1912      **Trains** , 1979      **Pure and Applied Science Books, 1876-1982** , 1982 Over 220 000 entries representing some 56 000 Library of Congress subject headings Covers all disciplines of science and technology e g engineering agriculture and domestic arts Also contains at least 5000 titles published before 1876 Has many applications in libraries information centers and other organizations concerned with scientific and technological literature Subject index contains main listing of entries Each entry
