Pvc Technology:

PVC Technology M.V. Titow, 2012-12-06 This book continues the tradition of the first two editions of the late W S Penn's original PVC Technology and the extensively revised third 1971 edition prepared by myself and B J Lanham. In the present edition the original general format and the arrangement of chapters have been largely preserved but virtually nothing now remains of Penn's own text; a part of the contents is based on material from the 1971 Titow/Lanham version revised, updated and mainly rewritten; the rest is new, including inter alia several chapters specially contributed by experts from the plastics industry in the UK and Europe. The section listing international ISO and national BS, ASTM and DIN standards relevant to PVC which was first introduced as Appendix 1 in the 1971 edition proved a popular feature; it has now been brought up to date and considerably extended. Two further appendices provide respectively comprehensive unit conversion tables with additional information on some of the most frequently encountered units and the SI units and a list of many properties of interest in PVC materials with definitions, typical numerical values and references to relevant standard test methods. For various reasons work on this edition involved more than the usual quota of problems. I am truly grateful to the Publisher's Managing Editor Mr G B Olley for his understanding, patience, unfailing courtesy and friendly encouragement. **PVC**

PVC Plastics W. V. Titow, 1990 This book originated from my Publisher's request for a new concise account of PVC plastics in terms of their nature properties processing and applications There is thus inevitably an extensive thematic overlap with my still relatively recent PVC Technology 4th edition and I have drawn liberally on that source for a substantial amount of relevant basic material However the present book is by no means merely an abridgement of the earlier one whilst

indeed considerably shorter it is not only comparable in scope and general coverage of the subject but also contains much new information I have made a point of again strongly featuring the numerous standards relevant and in many cases cardinal to the testing and characterisation of PVC materials and products and to the evaluation of their properties and performance these standards are an indispensable part of the technology of PVC plastics and nobody concerned with any aspect of this complex subject should fail to recognise that fact It is ever a pleasure to express appreciation and thanks where they are due I am grateful to Dipl Ing H E Luben of Brabender OHG Duisburg FRG not only for the up to date information he provided on Brabender equipment but also most particularly for his exceptionally friendly helpful attitude in all our contacts and for the trouble he took to make some illustrations and figures available in the form convenient for direct reproduction
