**Poetry & Listening** Zoë Skoulding, 2020-11-04 Listening has always mattered in poetry but how does poetry change when listening has been transformed In Poetry Listening The Noise of Lyric the field of sound studies which has revolutionised research in contemporary music is brought into dialogue with new lyric criticism Examining poetry as mediated by performance technology and translation this book discovers how contemporary poetry has been re energised by the influence of recorded sound and influenced by the creative methods that emerged with it It offers an exploration of contemporary poetry s acoustic contexts moving beyond traditional analysis of poetic form to consider the social political and ecological dimensions of a poem s sounds and silences Through lucid engagement with a range of richly innovative English language poetry from the UK and USA it argues for the centrality of listening to a form of composition in which language not only represents sonic experience but is part of it With reference to Jean Luc Nancy s distinction between hearing and listening alongside other key theorists of sound and noise it shows how poetry offers insights into sensory perception and how it charts acoustic relationships between language and the environment
