Oxide Based Materials New Sources Novel Phases New Applications:

Oxide Based Materials Aldo Gamba, Carmine Colella, Salvatore Coluccia, 2005 The International Workshop New sources novel phases new applications the third of the series on Oxide based materials was held September 13 to 16 2004 at Societ del Casino Sociale in Como Italy The workshop brought together experimental and theoretical scientists of different origins and expertise to exchange information on common scientific research fields especially on all those materials whose features and properties depend on the interaction between surface and ionic and or molecular species Knowledge of familiar materials was compared and experiences shared on a varied range of different materials often new materials including metal oxides zeolites and other microporous compounds mesoporous silicates and silica hybrid inorganic organic compounds soil aggregates layered materials and bioactive glasses Brings together experimental and theoretical information Provides information on new oxide based materials with applications in catalysis pollution control and nanoengineering Contributions from experts in the field

Scientific Bases for the Preparation of Heterogeneous Catalysts E. Gaigneaux, M Devillers, D.E. De Vos, S. Hermans, P. Jacobs, J. Martens, P. Ruiz, 2006-09-19 This volume of Studies in Surface Science and Catalysis contains the Proceedings of the 9th International Symposium on the Scientific Bases for the Preparation of Heterogeneous Catalysts held on the campus of the Universit catholique de Louvain UCL in Louvain la Neuve Belgium on September 10 14 2006 This series of symposia was initiated in 1975 on a regular 4 year interval basis The Symposium covered the following topics key aspects in catalysts preparation micro and mesoporous supports supported metal catalysts structured catalysts tailored zeolites catalysis by bases and catalysts for fuel production These topics served as guidelines for the sessions both in the programs of oral communications 41 contributions including 7 keynote communications one for each topic and poster presentations 101 contributions In addition the opening invited lecture addressed the question of scaling up high throughput experimental approaches Contains a collection of the papers presented at the workshop

Biocatalysis in Oil Refining, 2011-09-22 Biocatalysis in Oil Refining focuses on petroleum refining bioprocesses establishing a connection between science and technology The micro organisms and biomolecules examined for biocatalytic purposes for oil refining processes are thoroughly detailed Terminology used by biologists chemists and engineers is brought into a common language aiding the understanding of complex biological chemical engineering issues Problems to be addressed by the future R D activities and by new technologies are described and summarized in the last chapter Updated references Studying bioprocessing problems looking at opportunities for improvements and technology developments

Past and Present in DeNOx Catalysis: From Molecular Modelling to Chemical Engineering Pascal Granger, Vasile Pârvulescu, 2007-12-15 This book offers an overview of the state of the art in the field of DeNOx catalysis in order to focus novel orientations new technological developments from laboratory to industrial scale A particular attention has been paid towards the

implementation of catalytic processes for minimising NO_x emissions either from stationary or mobile sources under lean condition to meet future standard regulations of NO_x emissions In the first part of this book critical aspects reported in the literature which usually make difficult the achievement of efficient catalytic technologies in those conditions are summarised and analysed in order two separate new perspectives The second part deals with fundamental aspects at molecular level A better understanding of the reactions involved under unsteady state conditions is probably a pre requisite step for improving the performances of the actual processes or developing original ones The development of powerful in situ spectroscopic techniques is of fundamental interest for kinetic modelling Correlations between spectroscopic and kinetic data with those obtained from theoretical calculations are reported Some illustrations emphasise the fact that these comparisons may help in determining the nature of the catalytic active sites and building predictive tools for simulations under running conditions The latter part of this book will be illustrated by different practical approaches covering various aspects related to the catalysts preparation and the development of alternative technologies which include industrial considerations New technological developments for investigating catalytic reactions in transient conditions in situ and operando spectroscopic techniques Concerted approaches in DeNO_x catalysis How academic aspects kinetic in situ spectroscopic measurements can provide useful information for practical applications Comparison of different approaches provided by academic and industrial partners

Introduction to Zeolite Molecular Sieves Jiri Cejka, Herman van Bekkum, A. Corma, F. Schueth, 2007-10-02
 Introduction to Zeolite Molecular Sieves 3rd Edition presents a collection of the most important results and ideas in the field of molecular sieve chemistry and technology the most important experimental techniques related to the research activities in molecular sieves and identifies new areas of molecular sieve chemistry Chapters start at a reasonably simple entry level but also covers the present state of the art in the field Topics covered include structure synthesis characterization ion exchange adsorption diffusion separations and natural zeolites 6 years since the last edition this book brings together the rapid development within the field of molecular sieve chemistry and applications Accessible to newcomers to the field also containing valuable information for experienced researchers 27 chapters written by renowned scientists in their field including updates on some 2nd edition chapters
