The Neglect of Long-Range Escort Development During the Interwar Years (1918-1943) - Stories of the P-51 Mustang, Martin

B-10 Bomber, Boeing P-26, Consolidated B-30, and Major General Claire Chennault Department of Defense,U. S. Air Force,U. S. Government,2017-09-16 This project is part of a series of Air Command and Staff College research papers that

discuss the development of American air power doctrine prior to World War II This paper discusses the relationship between the development of air power doctrine and the development of long range escorts for strategic bombardment in World War II

INTRODUCTION Thesis Statement Scope THE STRUGGLE FOR AIR POWER IN THE 1920s Pursuit Aviation Dominance The Struggle to Fund Air Power Army Versus Navy Research and Development BOMBARDMENT DOMINANCE IN THE 1930s

Bomber Dominance The Effects of Depression Era Budgets Multi Seat Versus Single Seat Pursuit THE ESCORT CRISIS

ENTERING WWII Need for Long Range Escort Realized Solutions to Escort Problem Multi Seat Fighters Fail Again Drop Tanks P 51 Mustang CONCLUSIONS Air Power Doctrine The Influence of Budget America s lack of effective long range

escort for strategic bombardment was the Army Air Force s worst failure of World War II The basic cause for peacetime negligence of long range escort development was that air power decisions were influenced more by budget considerations and less by sound doctrine This historical study uses a chronological approach to describe the evolution of long range fighter

escort Air power doctrine was driven by technical advances and consisted of untried theories The advent of the all metal mono plane gave credibility to the emerging doctrine of strategic bombardment The Air Corps became polarized between

bomber and pursuit advocates where the dominate doctrine of employing self protecting bomber formations devalued the role of long range escort Money was viewed as the critical ingredient for building air power while doctrine was secondary

The desire to attain air power during an era of constrained budgets produced unhealthy competition between the Army and Navy Restrictive budgets also required prioritization of research and development and production programs Several efforts failed to produce multi purpose aircraft that would also fulfill the escort role The Spanish Civil War experience proved the need for long range escort This late realization prompted the programs that eventually produced an effective long range

escort **Flying Aircraft Carriers of the USAF: McDonnell Xf-85 Goblin** Brian Lockett,2009-08-01 The P 85 Goblin was the only airplane that ever flew which was designed from scratch to be operated entirely from another airplane The development of the B 36 by the Consolidated Vultee Aircraft Corporation of Fort Worth Texas resulted in a requirement for fighter

protection for the bomber at distances from any friendly base that far exceeded the range of currently available escort fighter airplanes. Due to the inability of contemporary fighters to escort B 36 bombers all the way to their targets the Army Air Corps initiated Project MX 472 Unconventional Fighter Design Studies on December 3 1942. The primary objective of the project was the development of a suitable method of protecting the B 36 on long range bombing missions. The McDonnell Aircraft Corporation designed the P 85 Goblin to fit entirely within the confines of the bomb bay of the B 36. The little fighter was just fifteen feet long with a wing span of twenty one feet. *The P-51 Mustang As an Escort Fighter: Development Beyond Drop Tanks to an Independent Air Force*, 1996. The P 51 Mustang was an outstanding fighter in World War II. Popular history gives the majority of the credit to the addition of drop tanks to this aircraft which extended its range and allowed it to be used as an escort fighter for bomber operations in World War II. This paper highlights the unique design characteristics of the P 51 Mustang with its Packard Merlin engine. The incorporation of innovative laminar flow wings and aerodynamic smoothing along with a delivery oriented production system made the aircraft an outstanding escort fighter. The addition of the drop tanks just made it better. Because of this addition to the Allied fighting force the doctrine of daylight strategic high altitude precision bombing by United States bombers was successful in World War II and the United States Air Force was born.

The Bombing War Richard Overy, 2013-09-26. The ultimate history of the Blitz and bombing in the Second World War from Wolfson Prize winning historian and author Richard Overy. The use of massive fleets of bombers to kill and terrorize civilians was an aspect of the Second World War which continues to challenge the idea that Allies specifically fought a moral war. For Britain bombing became perhaps its principal contribution to the fighting as night after night exceptionally brave men flew over occupied Europe destroying its cities. The Bombing War radically overhauls our understanding of the War. It is the first book to examine seriously not just the most well known parts of the campaign but the significance of bombing on many other fronts the German use of bombers on the Eastern Front for example as well as much newly discovered material on the more familiar Blitz on Britain or the Allied campaigns against Italian cities. The result is the author's masterpiece a rich gripping picture of the Second World War and the terrible military technological and ethical issues that relentlessly drove all its participants into an abyss. Reviews. Magnificent must now be regarded as the standard work on the bombing war. It is probably the most important book published on the history of the second world war this century. Richard J Evans, *Guardian*. Monumental this is a major contribution to one of the most controversial aspects of the Second World War full of new detail and perspectives hugely impressive James Holland *Literary Review*. This tremendous book does what the war it describes signally failed to do. With a well thought out strategy and precision it delivers maximum force on its objectives. The result is a masterpiece of the historian's art. *The Times*. It is unlikely that a work of this scale scope and merit will be surpassed. *Times Higher Education*. What distinguishes Mr Overy's account of the bombing war from lesser efforts is the wealth of narrative detail and analytical rigour that he brings to bear. *Economist*. Excellent Overy is never less than an erudite

and clear eyed guide whose research is impeccable and whose conclusions appear sensible and convincing even when they run against the established trends Financial Times Hard to surpass If you want to know how bombing worked what it did and what it meant this is the book to read Times Literary Supplement About the author Richard Overy is the author of a series of remarkable books on the Second World War and the wider disasters of the twentieth century The Dictators Hitler s Germany Stalin s Russia won both the Wolfson Prize for History and the Hessell Tiltman Prize He is Professor of History at the University of Exeter Penguin publishes 1939 Countdown to War The Morbid Age Russia s War Interrogations The Battle of Britain and The Dictators He lives in London **The Bombers and the Bombed** Richard Overy,2014-02-20 The ultimate history of the Allied bombing campaigns in World War II Technology shapes the nature of all wars and the Second World War hinged on a most unpredictable weapon the bomb Day and night Britain and the United States unleashed massive fleets of bombers to kill and terrorize occupied Europe destroying its cities The grisly consequences call into question how moral a war the Allies fought The Bombers and the Bombed radically overhauls our understanding of World War II It pairs the story of the civilian front line in the Allied air war alongside the political context that shaped their strategic bombing campaigns examining the responses to bombing and being bombed with renewed clarity The first book to examine seriously not only the well known attacks on Dresden and Hamburg but also the significance of the firebombing on other fronts including Italy where the crisis was far more severe than anything experienced in Germany this is Richard Overy s finest work yet It is a rich reminder of the terrible military technological and ethical issues that relentlessly drove all the war s participants into an abyss

Pioneer Mustang Group Steve Blake,2008 As the first unit to fly the Merlin engined P 51B in combat the 354th Fighter Group adopted the nickname Pioneer Mustang Group Until D Day it escorted 8th AF heavy bombers to targets on the European Continent The group then moved to France and supported Patton s Third Army from Normandy to Bavaria and also participated in the Battle of the Bulge Its pilots scored over 600 confirmed air victories and forty three of them became aces This book is an almost day to day account of their aerial combat experiences and the gypsy lifestyle they and their support personnel led as they moved from one airfield to another across Western Europe

Hitler's Northern War Adam R. A. Claasen,2001 Adolf Hitler had high hopes for his conquest of Norway which held both great symbolic and great strategic value for the Führer Despite early successes however his ambitious northern campaign foundered and ultimately failed Adam Claasen for the first time reveals the full story of this neglected episode and shows how it helped doom the Third Reich to defeat Hitler and Raeder the chief of the German navy were determined to take and keep Norway By doing so they hoped to preempt Allied attempts to outflank Germany protect sea lanes for German ships access precious Scandinavian minerals for war production and provide a launchpad for Luftwaffe and naval operations against Great Britain Beyond those strategic objectives Hitler also envisioned Norway as part of a pan Nordic stronghold a centerpiece of his new world order But as Claasen shows Hitler s grand expectations were never realized Göring s Luftwaffe was the vital spearhead in the invasion of Norway which marked a number of wartime firsts Among other things it involved the first large scale aerial operations over sea rather than land the first time operational objectives and logistical needs were fulfilled by air power and the first deployment of paratroopers Although it got off to a promising start the German effort particularly against British and arctic convoys was greatly hampered by flawed strategic thinking interservice rivalries between the Luftwaffe and navy the failure to develop a long range heavy bomber the diversion of planes and personnel to shore up the German war effort elsewhere and the northern theater s harsh climate and terrain Claasen s study covers every aspect of this ill fated campaign from the 1940 invasion until war s end and shows how it was eventually relegated to a backwater status as Germany fought to survive in an increasingly unwinnable war His compelling account sharpens our picture of the German air force and widens our understanding of the Third Reich s way of war
