uncontrolled increases in raw material prices and an uncertain guarantee of supply This uncertainty is compounded by rising energy prices putting the entire agrifood supply chain which is highly energy intensive in crisis In addition the current war scenario could impact the demand for agricultural and food products by changing consumers purchasing habits Increasing the resilience of agri food systems may need to become a priority for many national economic systems In this scenario the routes to achieve resilient agrifood systems are numerous and include reducing agriculture s dependence on energy energy intensive imports and raw material imports Resilience also requires diversified import sources and market outlets through sound multilateral and bilateral trade policy
