Modern Architect:

Making it Modern Aaron Betsky, 2016-12-15 At its root modernism is that fundamental It is a question of having something to represent that is of the moment In the most radical interpretation modernism always comes too late The modern is that which is always new which is to say always changing and already old by the time it has appeared Modernism is always a retrospective act one of documenting or trying to catch what has already appeared an attempt to fix life as it is being lived Modernity is just the very fact that we as human beings are continually remaking the world around us through our actions and are doing so consciously Modernism is a monument to or memory of that act which in its own making tries to remake the world it is pretending to represent The Modern Architect, Or, Every Carpenter His Own Master Edward

Shaw, 1856 **The Meaning of Modern Architecture** Dr Hans Rudolf Morgenthaler, 2015-09-28 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings It proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities the sensual and intuitive understandings of composition form and space are emphasized Modern Architecture Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition

Essays in Architectural Criticism Alan Colquhoun, 1981 Preface by Kenneth Frampton Winner of the 1985 Architectural Critics Award for the best book published on architectural criticism over the past three years Since the early 1950s Alan Colquhoun's criticism and theory have acted as a conscience to a generation of architects His rigor and conceptual clarity have consistently stimulated debate and have served as an impetus for the pursuit of new directions in both theory and practice This collection of 17 of his essays marks a watershed in the development of architectural thinking over the past three decades comprising a virtual theory of Modernism in architecture In his earliest essays Colquhoun concentrated on themes that for him comprised the modernist attitude in architecture language typology and the structure of form His stance since then has consistently been to try to relate these issues to current practice and to analyze the nature of architectural expression in relation to culture Alan Colquhoun divides his time between England where he is a principal in the firm of Colquhoun Miller and the United States where he is Professor of Architecture at Princeton University An Oppositions Book *25 Concepts in Modern Architecture* Stephanie Travis, Catherine Anderson, 2021-08-26 Designed to appeal to visual

thinkers 25 Concepts in Modern Architecture explores the fundamental ideas behind architectural design through easy to follow sketches drawings and succinct explanations Twenty five concepts each of which are key to architectural design thinking are accessibly explained by examining twenty five different masterworks of modern architecture For example the concept of movement in architectural design is explained through a close look at a Le Corbusier building transparency is examined in Philip Johnson s seminal Glass House asymmetry is understood through the work of Zaha Hadid and so on through twenty five core concepts and twenty five of the most significant buildings of the modern era Taking a highly visual approach this simple yet visually powerful guide is an essential companion in the design studio and to introductory courses in modern architecture interior architecture and interior design Understanding these concepts will provide a key to demystifying the greatest works in modern architectural history inspire new ways to think about new design projects and reveal how drawing and sketching are used as tools for the visual analysis of architecture

Making Houston Modern Barrie Scardino Bradley, Stephen Fox, Michelangelo Sabatino, 2020-07-01 This collection of essays examines the life and legacy of Houston architect Howard Barnstone whose modernist designs and pioneering writings reshaped perceptions of the architecture of Texas

Modern Architecture Otto Wagner, 1988 In 1896 Otto Wagner s Modern Architecture shocked the European architectural community with its impassioned plea for an end to

eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials. Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement. Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896, 1898 and 1914 editions. In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity. Modern Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development. It defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century.

[California Modern](#) Neil Jackson, 2002 In the 1950s a series of dramatic open and elegant homes made him a media star and interest in the work of his atelier has only increased over time.

[When Modern Was Green](#) David Haney, 2010 Today contemporary landscape design is increasingly drawing from ideas of sustainability and ecological stability. Not in fact new the foundations of this approach stem from early twentieth century Germany where architects and planners were already beginning to use the design concepts which are now referred to as green. This ecological school of thought was driven by modernist landscape architect Leberecht Migge 1881-1935. Working with significant modernist architects of the age including Martin Elsaesser, Ernst May, Bruno Taut and Martin Wagner, Migge was responsible for some of the most important housing and planning projects of the age the mass housing settlements or *Großsiedlungen* of Frankfurt Main and Berlin. Using biotechnic principles to integrally link dwelling and garden, Migge was able to recycle household

waste to grow foodstuffs through the use of innovative infrastructure and open space planning Also a skilled park and garden designer he drew together green and architectural elements in his garden architectonic approach David H Haney s book is the first to fully document Leberecht Migge s life and work Using Migge as a starting point Haney addresses conceptual and theoretical aspects of German ecological design challenging conventional assumptions about modernism and ecological design history With 200 illustrations and photographs When Modern Was Green is ideal for students and academics interested in modernism landscape history and higher level German studies

Pietro Belluschi Meredith L. Clausen,1994 Meredith Clausen reveals the enormous power that Belluschi wielded as an arbiter of taste and decision maker in the 1950s and 1960s his role in shaping the policy of the State Department in its overseas building program and his role in securing major commissions for favored architects such as I M Pei Equally important is Clausen s discussion of Belluschi s role in the development of regionalism in the Pacific Northwest and its impact on the definition of modernism as it was emerging in the United States
