Modern French Politics:

Modern French Politics Nick Hewlett, 1998-03-06 This book is an accessible original and thought provoking examination of contemporary French politics The author clearly explains the most important party political ideological and electoral developments since the Second World War focusing on the 1980s and 1990s in particular He takes care to explain changes within a clear theoretical framework which enhances the reader's understanding of observable trends When Francois Mitterrand was elected President of the Republic in 1981 a new radical era began in French politics But within the space of a few years the Socialist Communist government felt obliged to change tack and abandon many of its more adventurous policies Hewlett's central question is whether one should talk of consensus politics under Mitterrand or even the end of conflict and revolt for which France had been so famous He looks at the modern political history of France in comparison with other countries including Britain Sweden and Germany He also considers the significance of various modernizing aspects of modern France including Gaullism May 1968 and the role of intellectuals Finally Modern French Politics relates the examination of change in France to more general theories of change in late capitalism This informative and refreshing book is scholarly but does not mystify It presents an original way of examining party political institutional and electoral developments and will be essential reading for undergraduate and graduate students of French politics and European Studies
