By understanding the psychological mechanisms behind our decisions we can make more informed decisions that align with our goals. Emotions such as fear greed and anxiety significantly influence our financial decisions. Fear of losing money can lead to conservative decisions while greed can lead to excessive risk taking. However they can lead us down a wrong path if not managed properly. By identifying and understanding our emotions we can make more rational decisions that are aligned with our long term goals. Cognitive biases are mental shortcuts we use to make decisions faster but they can lead us to make mistakes. Examples of biases include loss aversion confirmation bias and herd behavior. How to identify and overcome these biases to make sounder financial decisions. Our brains are incredible machines but they are also prone to making mistakes.
