Modelling With Words:

Modelling with Words Jonathan Lawry, James G. Shanahan, Anca Ralescu, 2003-11-10 Modelling with Words is an emerging modelling methodology closely related to the paradigm of Computing with Words introduced by Lotfi Zadeh This book is an authoritative collection of key contributions to the new concept of Modelling with Words A wide range of issues in systems modelling and analysis is presented extending from conceptual graphs and fuzzy quantifiers to humanist computing and self organizing maps Among the core issues investigated are balancing predictive accuracy and high level transparency in learning scaling linguistic algorithms to high dimensional data problems integrating linguistic expert knowledge with knowledge derived from data identifying sound and useful inference rules integrating fuzzy and probabilistic uncertainty in data modelling

Aggregating Dialectology, Typology, and Register Analysis Benedikt Szmrecsanyi, Bernhard Wälchli, 2014-01-31 This volume aims to overcome sub disciplinary boundaries in the study of linguistic variation be it language internal or cross linguistic Even though dialectologists register analysts typologists and quantitative linguists all deal with linguistic variation there is astonishingly little interaction across these fields But the fourteen contributions in this volume show that these subdisciplines actually share many interests and methodological concerns in common The chapters specifically converge in the following ways First they all seek to explore linguistic variation within or across languages Second they are based on usage data that is on corpora of more or less authentic text or speech of different languages or language varieties Third all chapters are concerned with the joint analysis also sometimes known as aggregation or data synthesis of multiple phenomena features or measurements of some sort And lastly the contributors all marshal quantitative analysis techniques to analyse the data In short the volume explores the text

feature aggregation pipeline in variation studies demonstrating that there is much mutual inspiration to be had by thinking outside the disciplinary box **Bayesian Models of Cognition** Thomas L. Griffiths, Nick Chater, Joshua B.
