*Deterministic and Stochastic Models of AIDS Epidemics and HIV Infections with Intervention* W. Y. Tan, Hulin Wu, 2005  
With contributions from an international team of leading researchers the book pulls together updated research results in the area of HIV AIDS modeling to provide readers with the latest information in the field Topics covered include AIDS epidemic models vaccine models models for HIV cell dynamics and interactions cellular kinetics viral dynamics with antiviral treatments modeling of drug resistance and quasispecies

**Contact Force Models for Multibody Dynamics** Paulo Flores, Hamid M. Lankarani, 2016-03-15 This book analyzes several compliant contact force models within the context of multibody dynamics while also revisiting the main issues associated with fundamental contact mechanics In particular it presents various contact force models from linear to nonlinear from purely elastic to dissipative and describes their parameters Addressing the different numerical methods and algorithms for contact problems in multibody systems the book describes the gross motion of multibody systems by using a two dimensional formulation based on the absolute coordinates and employs different contact models to represent contact impact events Results for selected planar multibody mechanical systems are presented and utilized to discuss the main assumptions and procedures adopted throughout this work The material provided here indicates that the prediction of the dynamic behavior of mechanical systems involving contact impact strongly depends on the choice of contact force model In short the book provides a comprehensive resource for the multibody dynamics community and beyond on modeling contact forces and the dynamics of mechanical systems undergoing contact impact events
