*Selected Works* Daniel Jones, 2003      *Europe and the Politics of Language* Máiréad Nic Craith, 2005-12-14 Do political boundaries impact on concepts of language How significant is language for citizenship in contemporary Europe Can disputed languages acquire full status Should non European languages receive recognition from the EU These are among the many questions explored in this new study of official regional and disputed languages in an ever changing European context Broad policy issues and the performance of the range of instruments of policy at local national and European levels are illustrated with reference to case studies across Europe      **Spatial Interrogatives in Europe and Beyond** Thomas Stolz, Nataliya Levkovych, Aina Urdze, Julia Nintemann, Maja Robbers, 2017-08-07 The extant generalizations about the grammar of space rely heavily on the analyses of declarative sentences There is a need to check whether these generalizations also hold in the domain of interrogation To this end this book analyzes data from some 450 languages including non standard varieties The focus is on paradigms of spatial interrogatives such as English where whither and whence and their internal organization These paradigms are checked for recurrent patterns of morphological mismatches such as syncretism and different degrees of complexity e g the number of segments The data base consists of a large parallel literary corpus *Le petit prince* and translations thereof which is complemented by further sources of information such as descriptive grammars The data are analyzed from a synchronic perspective However diachronic issues are addressed unsystematically too It is shown that the distribution of phenomena which characterize paradigms of spatial interrogatives are subject to areal linguistic factors This is the first typological study of spatial interrogatives It provides new insights for students of the grammar of space morphological paradigms and language typology      *A Companion to the Translation of Classical Epic* Richard H. Armstrong, Alexandra Lianeri, 2025-03-10 The first volume of its kind to integrate trends in Translation Studies with Classical Reception Studies *A Companion to the Translation of Classical Epic* provides a comprehensive and wide ranging account of key debates and case studies centered the translation of Greek and Latin epics Rather than situating translation studies as a complementary field or an aspect of classical reception the Companion offers a systematic framework for adapting and incorporating translation studies fully into classical studies Its many chapters elaborate how translation is a central element in the epic s reception trajectories across the globe and addresses theoretical and methodological concerns arising from this conjunction The Companion does not just provide a comprehensive overview of the translation theories it covers but also offers fresh insights into theoretical and methodological issues currently at the top of the interdisciplinary agenda of scholars studying the global routes of ancient epic In its sections leading classicists translation theorists classical reception scholars and cultural historians from Europe and North and South America reconfigure questions this research faces today highlighting methods for an integrated approach It explores how this integrated perspective responds to key challenges in the study of the epic s reception emphasizing topics of temporality gender agency community target language politics and

material production A special section also features detailed dialogues with active translators such as Emily Wilson Stanley Lombardo and Susanna Braund who speak extensively and frankly about their work This is a key volume for all students and scholars who want to engage with research reflecting the contemporary agenda in classical reception translation studies and the study of epic in its global literary and cultural routes History, Society and Variation Albert Valdman, J. Clancy Clements, 2006-01-01 This volume presents a collection of new articles by sixteen specialists in the field of pidgin and creole studies assembled in honor of the world renowned creolist Albert Valdman The articles written from a variety of theoretical perspectives are organized thematically in three sections on the history of specific pidgins or creoles including Louisiana Creole and Haitian Creole on the sociohistorical settings that gave rise to these contact languages and issues affecting their future development and on issues of linguistic variation and change In keeping with Valdman's own primary interests the French based creoles receive the most attention including both those of the Atlantic zone and those of the Indian Ocean but the volume also presents significant scholarship on English and Portuguese based varieties **An Ecology of World Literature** Alexander Beecroft, 2015-03-03 What constitutes a nation's literature How do literatures of different countries interact with one another In this groundbreaking study Alexander Beecroft develops a new way of thinking about world literature Drawing on a series of examples and case studies the book ranges from ancient epic to the contemporary fiction of Roberto Bolaño and Amitav Ghosh Moving across literary ecologies of varying sizes from small societies to the planet as a whole the environments in which literary texts are produced and circulated An Ecology of World Literature places in dialogue scholarly perspectives on ancient and modern western and non western texts navigating literary study into new and uncharted territory **Cognitive Linguistics and Non-Indo-European Languages** Eugene H.
