Nonlinear Functional Evolutions In Banach Spaces:

Nonlinear Functional Evolutions in Banach Spaces Ki Sik Ha, 2013-04-17 There are many problems in nonlinear partial differential equations with delay which arise from for example physical models biochemical models and social models Some of them can be formulated as nonlinear functional evolutions in infinite dimensional abstract spaces Since Webb 1976 considered autonomous nonlinear functional evolutions in infinite dimensional real Hilbert spaces many nonlinear analysts have studied for the last nearly three decades autonomous nonlinear functional evolutions non autonomous nonlinear functional evolutions and quasi nonlinear functional evolutions in infinite dimensional real Banach spaces The techniques developed for nonlinear evolutions in infinite dimensional real Banach spaces are applied This book gives a detailed account of the recent state of theory of nonlinear functional evolutions associated with accretive operators in infinite dimensional real Banach spaces Existence uniqueness and stability for solutions of nonlinear functional evolutions are considered Solutions are presented by nonlinear semigroups or evolution operators or methods of lines or inequalities by Benilan This book is divided into four chapters Chapter 1 contains some basic concepts and results in the theory of nonlinear operators and nonlinear evolutions in real Banach spaces that play very important roles in the following three chapters Chapter 2 deals with autonomous nonlinear functional evolutions in infinite dimensional real Banach spaces Chapter 3 is devoted to non autonomous nonlinear functional evolutions in infinite dimensional real Banach spaces Finally in Chapter 4 quasi nonlinear functional evolutions are considered in infinite dimensional real Banach spaces

Nonlinear operators and nonlinear equations of evolution in Banach spaces Felix E. Browder, 1968 *Nonlinear Operators and Nonlinear Equations of Evolution in Banach Spaces* Felix E. Browder, 1976 *Evolution Inclusions and Variation Inequalities for Earth Data Processing I* Mikhail Z. Zgurovsky, Valery S. Mel'nik, Pavlo O. Kasyanov, 2010-10-01 Here the authors present modern mathematical methods to solve problems of differential operator inclusions and evolution variation inequalities which may occur in fields such as geophysics aerohydrodynamics or fluid dynamics For the first time they describe the detailed generalization of various approaches to the analysis of fundamentally nonlinear models and provide a toolbox of mathematical equations These new mathematical methods can be applied to a broad spectrum of problems Examples of these are phase changes diffusion of electromagnetic acoustic vibro hydro and seismoacoustic waves or quantum mechanical effects This is the first of two volumes dealing with the subject *Measure-Valued Solutions for Nonlinear Evolution Equations on Banach Spaces and Their Optimal Control* N. U. Ahmed, Shian Wang, 2023-09-12 This book offers the first comprehensive presentation of measure valued solutions for nonlinear deterministic and stochastic evolution equations on infinite dimensional Banach spaces Unlike traditional solutions measure valued solutions allow for a much broader class of abstract evolution equations to be addressed providing a broader approach The book presents extensive results on the existence of measure valued solutions for differential equations that have no solutions in the usual sense It covers a range of

topics including evolution equations with continuous discontinuous vector fields neutral evolution equations subject to vector measures as impulsive forces stochastic evolution equations and optimal control of evolution equations The optimal control problems considered cover the existence of solutions necessary conditions of optimality and more significantly complementing the existing literature This book will be of great interest to researchers in functional analysis partial differential equations dynamic systems and their optimal control and their applications advancing previous research and providing a foundation for further exploration of the field

Evolution Equations And Approximations Kazufumi Ito,Franz Kappel,2002-05-24 This book presents an approximation theory for a general class of nonlinear evolution equations in Banach spaces and the semigroup theory including the linear Hille Yosida nonlinear Crandall Liggett and time dependent Crandall Pazy theorems The implicit finite difference method of Euler is shown to generate a sequence convergent to the unique integral solution of evolution equations of the maximal monotone type Moreover the Chernoff theory provides a sufficient condition for consistent and stable time integration of time dependent nonlinear equations The Trotter Kato theorem and the Lie Trotter type product formula give a mathematical framework for the convergence analysis of numerical approximations of solutions to a general class of partial differential equations This book contains examples demonstrating the applicability of the generation as well as the approximation theory In addition the Kobayashi Oharu approach of locally quasi dissipative operators is discussed for homogeneous as well as nonhomogeneous equations Applications to the delay differential equations Navier Stokes equation and scalar conservation equation are given

Delay Differential Evolutions Subjected to Nonlocal Initial Conditions Monica-Dana Burlică,Mihai Necula,Daniela Roşu,Ioan I. Vrabie,2018-09-03 Filling a gap in the literature Delay Differential Evolutions Subjected to Nonlocal Initial Conditions reveals important results on ordinary differential equations ODEs and partial differential equations PDEs It presents very recent results relating to the existence boundedness regularity and asymptotic behavior of global solutions for differential equations and inclusions with or without delay subjected to nonlocal implicit initial conditions After preliminaries on nonlinear evolution equations governed by dissipative operators the book gives a thorough study of the

existence uniqueness and asymptotic behavior of global bounded solutions for differential equations with delay and local initial conditions It then focuses on two important nonlocal cases autonomous and quasi autonomous The authors next discuss sufficient conditions for the existence of almost periodic solutions describe evolution systems with delay and nonlocal initial conditions examine delay evolution inclusions and extend some results to the multivalued case of reaction diffusion systems The book concludes with results on viability for nonlocal evolution inclusions *Differential and Integral Equations* ,2002 **Nonlinear Functional Analysis** Felix E.
