Normal Aging Erdman Palmore,1970      **Normal Aging** Erdman Palmore,1973      **Normal Aging: 1955-1969** Erdman Ballagh Palmore,1970      Profiles of Social Research Morton M. Hunt,1986-06-06 This splendid introduction to social research describes an area of scientific investigation that profoundly influences our daily lives and thoughts but about which most of us know very little We can picture a research chemist at work white coated and surrounded by beakers and test tubes but what is the nature of social research For interested general readers and particularly for students entering the various social science fields Morton Hunt paints an immensely informative and accessible portrait He begins with a lucid overview of the important varieties of social research describing their advantages and limitations Against this background Hunt then details five remarkable case histories eyewitness accounts of significant recent episodes in social research Woven skillfully through each narrative are explorations of the basic methodological practical moral and political issues raised by social research The story of a noteworthy series of sociopsychological experiments on teamwork for example enables Hunt to weigh the merits of using a laboratory setting to study social behavior and the ethics of deceiving human subjects In similar fashion Hunt depicts a historic cross sectional survey on segregated schooling a complex attempt to measure the impact of welfare programs a real world experiment with guaranteed annual incomes and a path breaking study of human aging that followed its subjects for a generation This engaging and intelligent book will give readers a new understanding of the

breadth and richness of social research as well as an informed appreciation of its significance for their lives      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965-70      **Aging** James L McGaugh,Sara B. Kiesler,2013-09-17 *Aging Biology and Behavior* addresses behavioral changes in aging related to biological processes focusing on the nature of changes in brain plasticity factors influencing life span and environmental and social influences on health in the elderly This book is divided into four main topics longevity aging and mortality aging brain and behavior cognitive and social functioning and health In these topics this publication specifically discusses the longevity in primates life span extension environment and biology in aging and some economic implications of life span extension The neurobiological basis of age related changes in neuronal connectivity aging and brain plasticity and cognitive functioning in the elderly are also elaborated This text likewise covers the life changes and disease in elderly populations social stress and mental disorders in the elderly and perspective of social epidemiology This volume is a useful source to clinicians and students examining possible social and behavioral science research perspectives on aging

**Sexuality and the Elderly** Bonnie L. Walker,1997-05-12 This literature review was undertaken in order to determine what caregivers needed to know about elderly sexuality to determine the needs of elderly people related to their sexuality and to determine how caregivers could best assist them in meeting those needs In selecting materials to be annotated for this book the first priority was given to empirical studies Also included were articles by prominent practitioners and researchers interested in elderly sexuality literature reviews and books written for the lay population which are often cited in the professional literature In addition to seeking knowledge about elderly sexuality and understanding attitudes about sexuality this literature review sought information about measurement issues and measurement instruments frequently used in research within elderly populations Also of interest were investigations of educational and training programs involving caregivers      **Normal Aging: 1955-1969** Duke University. Center for the Study of Aging and Human Development,1970

**Health planning reports subject index** United States. Health Resources Administration,1979      The International Journal of Aging & Human Development ,1994      Geriatric Medicine C.K. Cassel,J.R. Walsh,2012-12-06 With the appearance of a textbook as comprehensive as this one it is clear that the field of geriatrics is coming of age The broad scope of these volumes shapes a substantial answer to the question What is geriatrics and why should we be interested in it As I see it there are at least five reasons First the scientific or intellectual reason gerontology is the study of aging from the biologic psychological and social perspectives There is increasing interest in the fascinating insights into the biologic mechanisms of aging errors in protein synthesis DNA repair mechanisms alterations of the neuroendocrine system changes in the immune system genetic controls and somatic mutations Second the demographic reason this is the century of old age There has been a 26 year gain in the average life expectancy This gain compares with that acquired from 3 000 years B C the Bronze Age to the year 1900 which was about 29 years Therefore in one century there has been a gain in the average life expectancy almost

equal to 5 000 previous years of human history In 1830 one of three newborn infants survived beyond 60 years of age
