TOWARDS AN ECOLOGY OF EMOTION **KAY MILTON**

Loving Nature Towards An Ecology Of Emotion

Lisa Ottum, Seth T. Reno

Loving Nature Towards An Ecology Of Emotion:

Loving Nature Kay Milton, 2002 In *Loving Nature* Kay Milton considers why some people in western societies grow up to be nature lovers actively concerned about the welfare and future of plants animals ecosystems and nature in general while others seem indifferent or intent on destroying these things Drawing on findings and ideas from anthropology psychology cognitive science and philosophy the author discusses how we come to understand nature as we do and above all how we develop emotional commitments to it The author argues that the conventional opposition between emotion and rationality in western culture is a myth the effect of which has been to exclude from public decision making the kind of emotional attachments that support more environmentally sensitive ways of living

Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In *Ontology and Closeness in Human Nature Relationships* Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce s synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an engaging novel treatment of human nature relational ontology that will encourage the reader to look at the world in a whole new way

The Routledge Handbook of Love in Philosophy Adrienne M. Martin, 2019-01-15 The *Routledge Handbook of Love in Philosophy* collects 39 original chapters from prominent philosophers on the nature meaning value and predicaments of love presented in a unique framework that highlights the rich variety of methods and traditions used to engage with these subjects This volume is structured around important realms of human life and activity each of which receives its own section I Family and Friendship II Romance and

Sex III Politics and Society IV Animals Nature and the Environment V Art Faith and Meaning VI Rationality and Morality VII Traditions Historical and Contemporary This last section includes chapters treating love as a subject in both Western and non Western philosophical traditions The contributions all appearing in print here for the first time are written to be accessible and compelling to non philosophers and philosophers alike and the volume as a whole encourages professional philosophers teachers students and lay readers to rethink standard constructions of philosophical canons Why Conserve Nature? Stephen Trudgill, 2022-02-24 How we view nature transforms the world around us People rehearse stories about nature which make sense to them If we ask the question why conserve nature and the answers are based on myths then are these good myths to have Scientific knowledge about the environment is fundamental to ideas about how nature works It is essential to the conservation endeavour However any conservation motivation is nested within a society's meanings of nature and the way society values it Given the therapeutic and psychological significance of nature for us and our culture this book considers the meanings derived from the poetic and emotional attachment to a sense of place which is arguably just as important as scientific evidence The functional significance of species is important but so too is the therapeutic value of nature together with the historic and spiritual meanings entwined in a human feeling for landscape and wildlife Feeling Climate Change Debra J. Davidson, 2024-08-16 Examining the social response to the mounting impacts of climate change Feeling Climate Change illuminates what the pathways from emotions to social change look like and how they work so we can recognize and inform our collective attempts to avert further climate catastrophe Debra J Davidson engages with how our actions are governed by a complex of rules norms and predispositions central among which operates our emotionality to assess individual and collective responses to the climate crisis applying a critical and constructive analysis of human social prospects for confronting the climate emergency in manners that minimize the damage and perhaps even enhance the prospects for meaningful collective living Providing a crucial understanding of our emotionality and its role in individual behaviour collective action and ultimately in social change this book offers researchers policymakers and citizens essential insights into our personal and collective responses to the climate emergency Future Nature William Mark Adams, 2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company *The Emotions* Helena Wulff, 2007-12-01 Emotions are a loaded topic From love and hate to grief fear and envy emotions are increasingly understood as driving forces in social life The Emotions A Cultural Reader applies a cross cultural perspective on emotions It examines the fact that emotions are socially and culturally constructed while highlighting problems of comparison and translation of local terms and emotional experiences Are emotions cultural or universal To what extent are there culturally distinct emotions The Emotions closes the traditional Western gap where emotions are separated from rationality and thought the heart versus mind debate By presenting both classic essays and new cutting edge chapters from anthropology sociology and psychology with important contributions from philosophy and neuroscience the volume connects a rich range
